

EXHIBIT 21

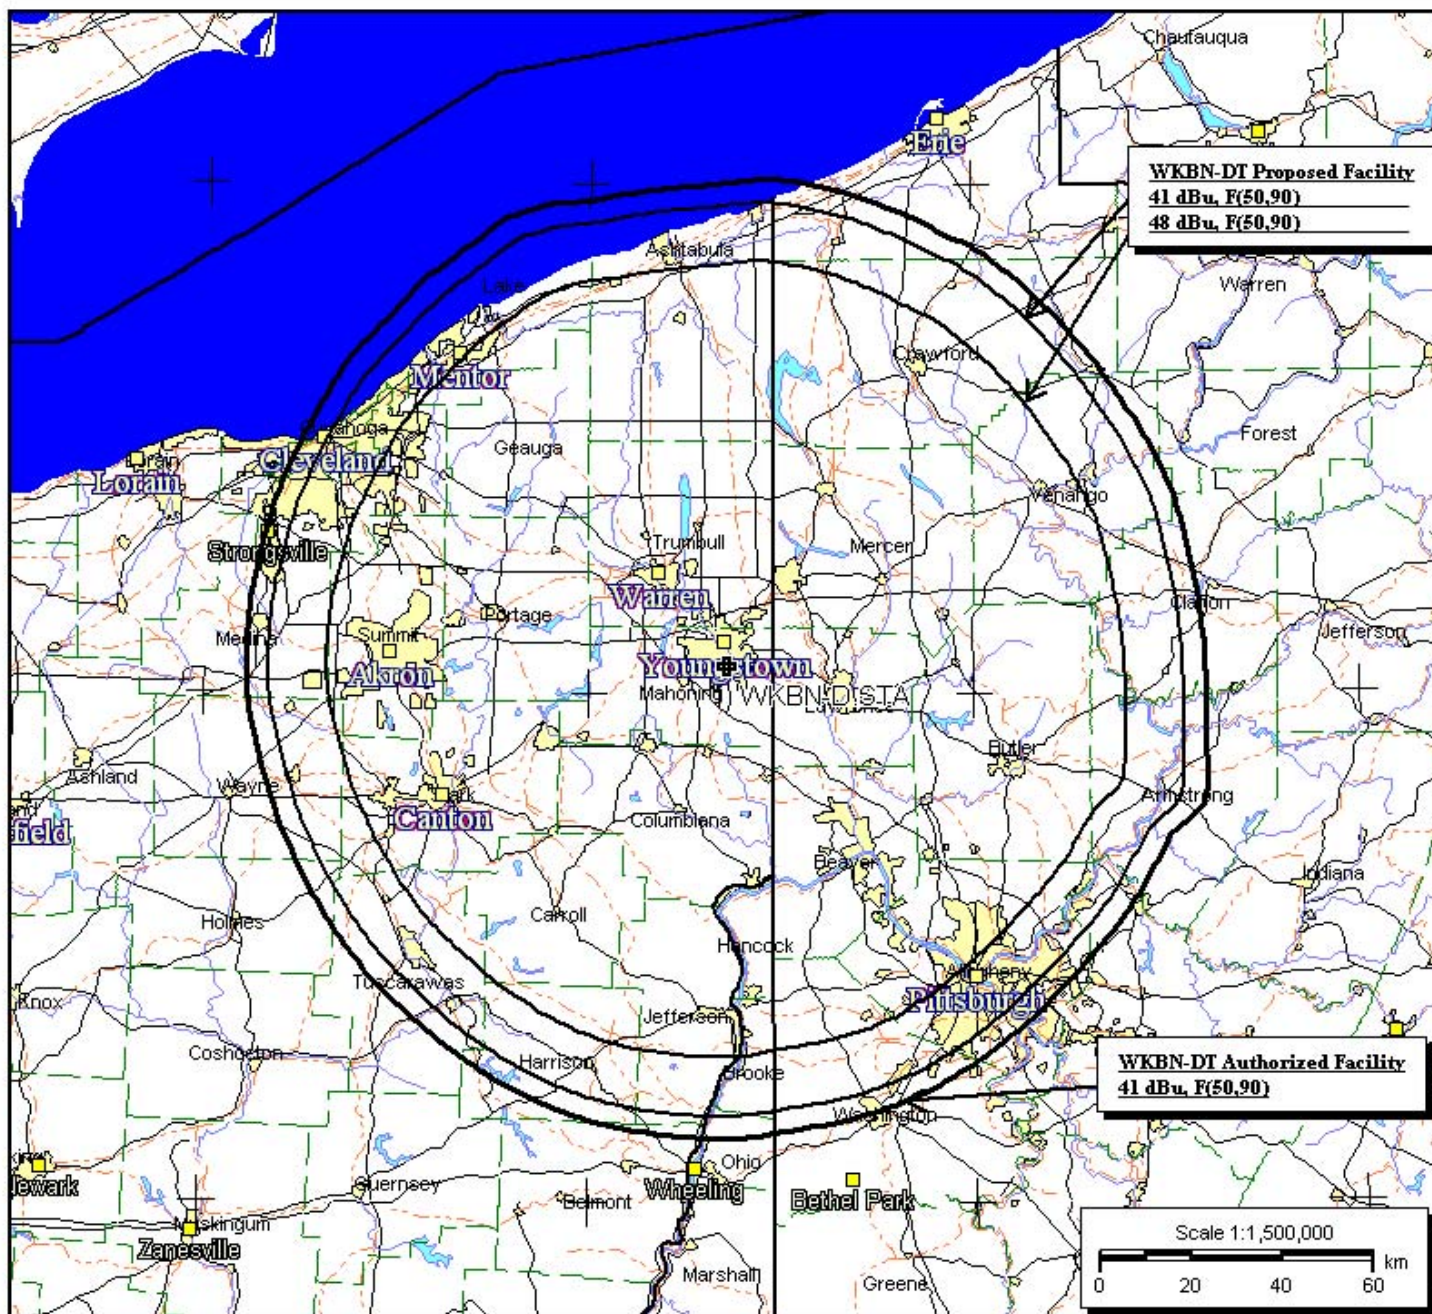

WKBN-DT Youngstown, Ohio

Piedmont Television of Youngstown License, LLC (Piedmont), Licensee of station WKBN-DT, Youngstown, Ohio, requests Special Temporary Authority (“STA”) to operate WKBN-DT with technical facilities different from those specified in the station’s existing construction permit (File No. BPCDT-19991025ACU).

Piedmont proposes to operate WKBN-DT at its authorized transmitter site, at its authorized Effective Radiated Power and with the authorized antenna but at a reduced Height of Radiation Center Above Ground from that which is authorized in the above-referenced construction permit. Specifically, Piedmont proposes to reduce the Height of Radiation Center Above Ground from 406 meters to 372.8 meters. A reduction in height of 33.2 meters

As demonstrated in the attached FCC Predicted Contours map, (Figure 1) the predicted service area of the proposed DTV operation will not exceed that authorized in the existing DTV construction permit for this station. The technical facilities requested comply with the FAA and FCC tower requirements, as well as the community of license coverage requirements.
