Art, Responding to your questions, as counsel for and on behalf on Educational Communications of Colorado Springs, Inc. (ECCS) regarding its Station KTML South Fork, CO application exhibit containing the chart which we discussed in last week's telephone conversation, ECCS agrees the chart is unnecessary and we ask that the Commission ignore it in making its decision on the application. Also, ECCS would change its answer to the question regarding Section 73.215 because the application already complies with the Commission's technical rules. The reference to Section 73.215 should be deleted. Please contact me should you have questions regarding this email. Lee Peltzman, Counsel to Educational Communications of Colorado Springs, Inc.
