Lake Charles, LA 70605

Dear Chad,

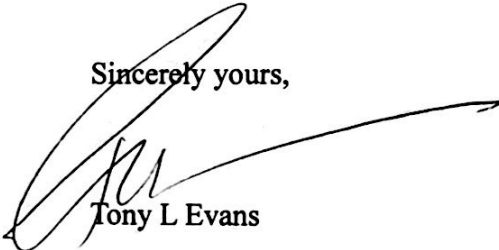

The KBYS installation was completed on June 14, 2018. The Electronics Research, Inc (ERI) antenna was constructed and installed according to the details outlined by ERI.

A representative of the land surveying company, Morrison Surveying Inc, located in Sulphur, LA was employed to determine the orientation of the antenna. The antenna was mounted and set outlined by ERI Drawing number IA34003-1, Page 3.

Once survey was completed it was noted the towers face orientation was not cardinal. With a fixed mount antenna orientation of antenna is now 102.5 degrees. ERI has been notified of the discrepancy and is working on a solution.

Tony L Evans is a consulting Broadcast Engineer with 35 years in the Broadcast Engineering electronics field.

Sincerely yours,

Tony L Evans
