

ENVIRONMENTAL CONSIDERATIONS
APPLICATION FOR CONSTRUCTION PERMIT
TELEVISION STATION WTTV-DT
BLOOMINGTON, INDIANA
CHANNEL 48 750 KW (MAX-DA) 357 M

An evaluation was conducted for the proposed facility concerning compliance with Section 1.1307(b) of the FCC Rules regarding human exposure to radio frequency (RF) energy.* Calculations prepared in accordance with FCC Bulletin OET-65 (Edition 97-01) indicate that the proposal will not result in human exposure to RF radiation at ground level in excess of FCC standards. Power density calculations were conducted at 2-m above ground based on the following conservative assumptions, with the following results:

Call Sign	Channel	Average ERP (kW)	Radiation Center Height Above Ground (m)	Relative Field Factor [†]	FCC Limit [‡] (mW/cm ²)	Percentage of Limit
WTTV-DT	48	750	332	0.20	0.451	2.0%

As indicated above, the total exposure to RF radiation at 2-m above ground level will not 2.0% of the FCC limit for general population / uncontrolled exposure. Therefore, the proposal complies with the FCC limits for human exposure to RF energy and it is categorically excluded from environmental processing. The applicant, in coordination with other users of the transmission facility, shall reduce power or cease operation as

* See FCC Office of Engineering and Technology Bulletin No. 56 for background information on non-ionizing RF energy of the type discussed here. Internet web reference:
