To Whom It May Concern,

Trinity Broadcasting has an application before FCC to increase power on its LPTV station K58BS. This application has a (-) offset and we are planning to build it as soon as FCC can grant the application. Since Three Angels Broadcasting Network, Inc. LPTV station K21FA is being displaced and they want to increase power with an omni pattern antenna on its K58GC construction permit, TBN is willing to change our current station to a - offset in case 3 ABN's application for power increase is granted before TBN's application is granted. In case of TBN's application is granted before the 3ABN application, this matter will be moot because our power increase will already have a (-) offset.

Sincerely,

A handwritten signature in cursive script that reads 'Ben Miller'.

Ben Miller  
Vice President, Engineering  
Trinity Broadcasting Network, Inc.
