

Compliance with Special Operating Conditions

The Construction Permit contains several Special Operating Conditions, summarized as follows:

1. The permittee/licensee must cooperate with other site users to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
 2. The permittee must either use a 4-bay 0.9 wavelength spaced ERI P300 OR provide documentation demonstrating compliance with the FCC radiofrequency field exposure guidelines.
 3. Waiver of 47 C.F.R. Section 73.1125 has been extended to allow operation of this facility as a satellite operation of KLVR(FM), Santa Rosa , CA (FIN 18801). See also Exhibit 6.
- EMF agrees to fully cooperate with other site users to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
 - EMF has chosen to use a Jampro JMVP 2-bay full-wave spaced antenna, and therefore, has taken RF measurements at the site. The results are contained in Exhibit 9A, and demonstrate that the site complies with OET-65.
 - Condition three has been met. See Exhibit 6.

Therefore, all Special Operating Conditions of the KLRV-FM Construction Permit (FCC File Number BMPED-20041122AAD) have been met.
