

EXHIBIT A

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of TRINITY BROADCASTING NETWORK, licensee of television translator K58GB, Channel 58 in Baton Rouge, Louisiana, in support of this Application for Construction Permit to specify operation on Channel 48 from the licensed K58GB site. This proposal is being submitted in response to the Commission's reclamation of Channel 58 spectrum for future auction, thereby placing this translator in a displacement situation.

It is proposed to mount a standard Andrew directional antenna at the authorized height on the side of an existing 529-meter communications tower. Exhibit B is a map upon which the predicted service contours are plotted. It is important to note that the newly proposed 74 dBu contour encompasses a significant portion of that which obtains from the licensed K58GB facility. Operating parameters for the proposed facility are tabulated in Exhibit C. A contour overlap analysis and interference study are provided in Exhibit D, and a power density calculation follows as Exhibit E.

Because no change in the overall height or location of the existing tower is proposed, the FAA has not been notified of this application. The FCC issued Antenna Structure Registration Number 1022810 to this tower.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

KEVIN T. FISHER

EXHIBIT C

PROPOSED OPERATING PARAMETERS

PROPOSED K58GB
CHANNEL 48 - BATON ROUGE, LOUISIANA

Transmitter Power Output:	4.0 kw
Transmission Line Efficiency:	23.0%
Antenna Power Gain – Toward Horizon:	14.06
Antenna Power Gain – Main Lobe:	14.06
Effective Radiated Power – Toward Horizon:	12.9 kw
Effective Radiated Power – Main Lobe:	12.9 kw
Transmitter Make and Model:	Type-accepted
Rated Output	4.0 kw
Transmission Line Make and Model:	Andrew HJ7-50A
Size and Type:	1-5/8" air heliax
Length:	1132 feet
Antenna Make and Model:	Andrew AL8
Orientation	45 degrees true
Beam Tilt	1.75 degrees
Effective Height Above Ground:	307 meters
Effective Height Above Mean Sea Level:	311 meters
