Mr. Erik Swanson, Consultant
Americom Las Vegas Ltd Partnership
11400 W. Olympic Blvd – Ste 780
Los Angeles CA 90064

**Ref: BPFT-20120323AGZ
K285EQ – Reno, Nevada**

Dear Mr. Swanson,

Thank you for your brief describing the proposed installation of translator station K285EQ's antenna array on the same structure as existing translator K211EB's antenna.

It is my observation that the vertical space of ~ 9 m between antennas should be more than sufficient to prevent any distortion to the directional radiation characteristics of the existing station.

This opinion carries no performance guarantee and is based solely on the data provided by Americom Las Vegas Ltd and the practical experience of our sales engineers. It is by no means a comprehensive analysis and Kathrein-Scala recommends Americom Las Vegas Ltd to engage the services of a qualified communications consulting firm for a definitive evaluation. The furnished data has not been verified by Kathrein-Scala for completeness or accuracy.

Please feel free to contact me if you need further assistance.

Best regards,

Michael Wm. Bach, Sales Engineer
