

RADIO MULTIPLE OWNERSHIP ANALYSIS
WCVU FID No: 71594
SEPTEMBER 1, 2010

This statement and the attached figures were prepared on behalf of Citicasters Licenses, Inc. ("CLI"), a licensed subsidiary of Clear Channel Communications, Inc. ("CCC"). CLI proposes to modify the facilities of WCVU(FM), Solana, Florida. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales.

Table 1: Proposed Commonly Owned, Brokered or Jointly-Sold Stations Studied and Associated Arbitron Metro¹ Information

Call Sign	Facility_id	City	State	Freq	Reported Arbitron Market
WCVU-PrP	71594	SOLANA	FL	FM	Non-Metro
WCCF	28897	PUNTA GORDA	FL	AM	Non-Metro
WKII	35214	SOLANA	FL	AM	Non-Metro
WOLZ	13898	FORT MYERS	FL	FM	Ft. Myers-Naples-Marco Island, FL
WIKX	28899	CHARLOTTE HARBOR	FL	FM	Ft. Myers-Naples-Marco Island, FL
WZJZ	35213	PORT CHARLOTTE	FL	FM	Non-Metro
WBCG	82071	MURDOCK	FL	FM	Non-Metro

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations) an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.² The station to be modified is not located within any Arbitron Metro.³

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of WCVU(FM) as proposed.

Interim Contour-Overlap Analysis

Because the principal community contour of the station to be modified intersects the principal community contour of attributable stations located outside any Arbitron Metro, and the subject station is itself located outside any Arbitron Metro, an interim contour-overlap analysis is set forth in this statement.

Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution. Here, such mutually overlapping contours form two "radio markets" for interim contour-overlap analysis under the Commission's rules.

¹ Arbitron data presented herein is obtained from BIA's "Media Access Pro."

² See 47 C.F.R. § 73.3555(a).

³ A station is considered to be "located in an Arbitron Metro" if the station's community of license is located within the boundaries of that Metro, or the station is listed as "Home" to that Metro by BIA.

A total of two “radio markets” are defined by the mutually overlapping principal community contours of the stations listed in *Table 1* above. *Table 2* is a detailed listing of each of those markets in tabular form, *Figure 1* is a map depicting markets defined in *Table 2*.

Table 2

Market 1		Market 2	
4-FM	2-AM	4-FM	2-AM
WCVU-PrP	FM	WCVU-PrP	FM
WBCG	FM	WOLZ	FM
WIKX	FM	WIKX	FM
WZJZ	FM	WZJZ	FM
WKII	AM	WKII	AM
WCFF	AM	WCFF	AM

Count of Stations in Defined Markets

The number of radio stations in an interim contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributable stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market.

In the interim contour-overlap “radio market(s)” studied herein, there are at least 19 radio stations, including the subject commonly owned stations, which overlap or intersect with the defined "radio market(s)." With 19 stations in a market, the applicable ownership limit is a combination of no more six stations, up to four in one service.

Figure 2 is the tabulation of the radio stations identified in “radio market 1.” *Figure 2a* is the tabulation of the radio stations identified in “radio market 2.” *Figure 3* is a map depicting the stations so identified. Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 5 degrees of azimuth.

Conclusions

In each of the interim contour-overlap “radio market(s)” studied herein, there are at least 31 stations.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.

Respectfully submitted,

Troy Langham
FCC Engineer
September 1, 2010
