COMPLIANCE WITH SPECIAL OPERATING CONDITIONS
prepared for
TV Alabama, Inc.
WCFT-DT Tuscaloosa, Alabama
Facility ID: 21258
Ch. 33 300 kW (MAX-DA) 659 m

TV Alabama, Inc. (“*TV Alabama*”) is the permittee of digital television station WCFT-DT, Tuscaloosa, Alabama. *TV Alabama* has completed construction of the DTV facility authorized in the construction permit (“CP”) FCC File No. BMPCDT-20090611ACX, and commenced post-transition operation on digital Channel 33.

The WCFT-DT CP contains one Special Operating Condition. This condition requires a good faith effort to notify health care facilities prior to the commencement of operation. Notification of biomedical telemetry devices became necessary when new DTV services were authorized on previously *unused* television channels. Such is not the case in this instance. WCFT-TV, analog Channel 33, has operated from the authorized WCFT-DT site for many years. As such, there should be no biomedical telemetry devices operating on 584 to 590 MHz (Channel 33) and no such devices located within the 5.5 km area past the analog facility’s Grade B contour¹. The 5.5 km extension of the analog Grade B contour was compared to the service contour of the authorized digital facility. The authorized digital facility’s service contour is wholly contained within the area bounded by the analog Grade B contour plus 5.5 km. Therefore, further notification is not believed to be necessary.
