Re: KRYK (FM), Chinook, Montana  
Facility Identification Number: 56336  
New Media Broadcasters, Inc.  
Request for Increased Digital Power  
Hybrid IBOC Digital Operation

Dear Counsel:

This is in reference to the request filed May 11, 2012, on behalf of New Media Broadcasters, Inc. ("NMB"). NMB requests authority to operate Station KRYK with increased digital effective radiated power ("ERP") of -10 dBc<sup>1</sup>, pursuant to the Media Bureau's *Order* adopted January 27, 2010, in MM Docket No. 99-325 ("*Order*").

Our review indicates that the notification requirements of the *Order* have been satisfied, and that the proposed operation complies with the contour nonoverlap and other technical requirements of the *Order*.

Accordingly, the request IS HEREBY GRANTED. Station KRYK may operate with increased digital ERP and transmitter power output ("TPO"), as follows:

Analog ERP:	100 kW (H&V)
Digital ERP:	10 kW (H&V)
Analog TPO:	24 kW
Digital TPO:	5.28 kW

The digital signal will be transmitted via licensed auxiliary antenna BXLH-20080915ACT.

---

<sup>1</sup> decibels relative to analog carrier

NMB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines; *See* 47 CFR § 1.1310. It may be necessary to reduce the power of the digital signal or cease hybrid operation if interference complaints are received. This authority may be modified or cancelled by the Commission without notice or right to hearing. This authority attaches to, and runs concurrently with, the main station license. NMB must post a copy of this authority with the station license.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with the first name "Charles" being the most prominent part.

Charles N. Miller, Engineer  
Audio Division  
Media Bureau
