

## EXHIBIT 12

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules.

Attached at exhibit 13 are a spacing study and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but two other FM facilities. The attached maps demonstrate that there is no prohibited contour overlap between these two facilities and the instant proposed FM translator facilities. One FM Translator and two full power stations have also been included on this study. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The five facilities that have been included on the attached maps are: WMGS, 92.9, Wilkes-Barre, PA (54 dBu contour to proposed 34 dBu interference contour); WIBF, 92.5, Mexico, PA (60 dBu contour to proposed 100 dBu interference contour); WQYX, 93.1, Clearfield, PA (57 dBu contour to prop. 51 dBu int. contour); WDHC, 92.9, Berkeley, WV (60 dBu contour to prop. 40 dBu int. contour); and W226AS, 93.1, Shermansdale, PA (60 dBu contour to proposed 54 dBu interference contour).

W288DE 92.9 Lewistown, PA 74.1204(d) Narrative and its related exhibits are included to show allowable overlap under Section 74.1204(d) with this proposal's 100 dBu interference contour and the 60 dBu coverage contour of WIBF, Mexico, PA. Maps with Blown Up scales have also been included to show the spacing between this proposal and WMGS and W226AS. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
