

ENGINEERING STATEMENT
AMENDMENT TO APPLICATION
CHICAGO NEWSWEB CORPORATION
RADIO STATION WCPT
ADDISON, ILLINOIS
FACILITY ID 53504

This engineering statement has been prepared on behalf of Chicago Newsweb Corporation, licensee of AM broadcast station WCPT Crystal Lake, Illinois and applicant for a change in principal community to Addison, Illinois, File No. BMJP-20041230ACB. The following information provides a comparison between the existing and proposed principal community.

The WCPT application proposes a change in principal community, with no change in the physical facilities of the station. Current coverage will remain unchanged, with no loss or gain area associated with the proposal.

Crystal Lake, IL had a 2000 Census population of 38,000 persons and has one local aural – WCPT. Addison, IL had population of 35,914 persons and has no local aural service. The proposal will therefore provide Addison with a first local aural broadcasting facility.

Crystal Lake will continue to receive a principal community signal level (5 mV/m for AM station and 3.16 mV/m for FM stations) from AM stations WSCR, WGN, WYLL, WBBM and WNVR and FM station WZSR.
