

## **Amendment Application**

### **Preclusion to LPFM Points**

This proposed facility has been studied to determine preclusion to LPFM points. Due to the location of the proposed transmitter site being outside of the 39km buffer zone around the relevant grid and being outside of the defined market area, this application does not require a Grid Test because the amended application cannot preclude any LPFM licensing opportunities in any grid.

### **Proposed facility changes in this application are as follows:**

- |                           |  |
|---------------------------|--|
| 1. Section III-A, Item 4: | Coordinates                            |
| 2. Section III-A, Item 5: | Tower ASR                              |
| 3. Section III-A, Item 6: | Ground Elevation                       |
| 4. Section III-A, Item 7: | Overall Tower Height                   |
| 5. Section III-A, Item 8: | Center of Radiation Above Ground Level |
| 6. Section III-A, Item 9: | Effective Radiated Power               |
