**March 2003**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Legend Communications of Wyoming, LLC (“Legend”), licensee of radio station KLGT, Channel 225C1, Buffalo, Wyoming. Legend also holds an outstanding construction permit that authorized minor changes in the facilities of KLGT (BPH-20020206AAW). Legend herein submits an application for license to cover the outstanding permit. Attached as Exhibit A is a calculation of the transmitter output power for KLGT.

There were two conditions listed on the KLGT permit. The first condition related to radio frequency radiations matters at the site. Legend herein restates that it will reduce the power of the station or cease operation, as necessary, to ensure that persons having access to the site will not be exposed to radio frequency radiation levels in excess of the Commission’s limits and has installed warning signs at the site to warn of potential radio frequency radiation levels. The remaining condition notes Legend indicated it would use a FCC Type # 3 antenna for KLGT (“rototiller”). As indicated on FCC Form 302-FM, Legend is using an ERI 8 bay rototiller antenna system for KLGT. Based on the foregoing, all conditions on the permit have been met.
