## **ENGINEERING STATEMENT IN SUPPORT OF APPLICATION FOR LPTV CONSTRUCTION PERMIT**

**IN RE:  
MINOR CHANGE TO LICENSED FACILITY  
DISPLACEMENT APPLICATION  
WDLP-CA, FCC ID 9425  
FCC FILE NUMBER BLTTL-19990513JD  
WDLP BROADCASTING COMPANY, LLC**

1. The within application is filed as a minor change to licensed facility seeking a change in location arising from a need for displacement relief. The facility as now licensed is displaced by WFOR-DT, Miami and is being moved closer to it in an effort to eliminate potential interference. Because the 74 dBu contour of the present license is contained within that of the proposal, the move is within normal minor change parameters.

2. The following is submitted as an OET 69 Longley-Rice study exhibit for the above-captioned application.

a. The stations which exhibit contour overlap or short spacing and thus must be studied are:

CALLSIGN AND LOCATION	FCC FILE NUMBER	INTERFERENCE FROM PROPOSAL
WLRNTV (17-) Miami	BLET19930216KG	NONE worst case
WLRN-D (20) Miami	BLEDT20030311AEF	NONE worst case
WTCE (21-) Fort Pierce	BLET19900510KE	0.036% worst case
WCLF-D.C (21) Clearwater	BPCDT19991101AHE	NONE worst case
WFOR-D.C (22) Miami	BMPCDT20010416AAH	NONE worst case
WFOR-D (22) Miami	BLCDT20011023ABS	NONE worst case
WLTN (23-) Miami	BLCT19950710KF	NONE worst case
WVEB-C (21Z) Miami, Etc.	BLTTL19980715JE	NOTE - See item 3 below

b. Accordingly, waiver of §73.705 and §73.706 as appropriate is requested.

3. WVEB-CA and the within proposal are part of a coordinated enterprise by the same business entity. In the course of processing, interference may be shown incoming to WVEB-CA as now licensed from the within proposal. WVEB-CA is in the process of filing a displacement application which, when constructed, will not experience that interference.
