

EXHIBIT 1

BNPFT-20030317BUT PALM SPRINGS, CA 297D APPLICATION SHORT FORM AMENDMENT LPFM NON-PRECLUSION SHOWING

This LPFM preclusion showing is provided because changes are made to the proposed Palm Springs application (hereafter 297APP), and it is located within the Palm Springs 30X30 Appendix A market.

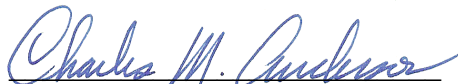

LPFM grid preclusion test:

The LPFM6 study excerpted herein shows the channel 298 LPFM channel points that must be protected. Exhibit 1A demonstrates that the 297APP maximum adjacent channel 28 km LPFM preclusion circle does not intersect any of the channel 298 points. Furthermore, the maximum 39 km co-channel preclusion circle does not reach the adjacent Riverside-San Bernardino 30X30 grid.

LPFM site test:

The proposed facility is not located with any county in a top 50 spectrum limited ARB metro market. However, an LPFM preclusion study is included below demonstrated that it does not preclude any channel at site.

It is concluded that the amended Palm Springs application does not preclude any LPFM channel point in an Appendix A market or any LPFM channel at its proposed site.
