

ENGINEERING STATEMENT
DISPLACEMENT TRANSLATOR APPLICATION
ON BEHALF OF
KTVQ COMMUNICATIONS, INC.
K18EF, HARDIN, MONTANA
CHANNEL 24 (+) 1.34 KW MAX 1010.3 METERS RCAMSL

FEBRUARY 2003

COHEN, DIPPELL AND EVERIST, P.C.
CONSULTING ENGINEERS
RADIO AND TELEVISION
WASHINGTON, D.C.

This engineering statement has been prepared on behalf of KTVQ Communications, Inc, licensee of translator-low power television station K18EF, Hardin, Montana, and is in support of its displacement application requesting a change from Channel 18 to Channel 24 (+). K18EF is displaced by the Channel 18 DTV allotment assigned to KSVI-DT by the Federal Communications Commission. K18EF is authorized to operate on Channel 18 with a non-directional ERP of 1.27 kW. K18EF proposes to operate from the existing site on Channel 24 (+ offset) with a maximum ERP of 1.34 kW max., using a Scala, Type SL-8 directional antenna. The proposed Channel 24 F(50,50) coverage contours are depicted in Exhibit E-3.

The NAD-27 geographic coordinates of the site (unchanged) are as follows:

North Latitude: 45° 44' 39"

West Longitude: 107° 32' 08"

Since no change in site is proposed, the 7.5 minute USGS topographical map is not being resubmitted, nor considered necessary. The tower registration number is 1062459.

Allocation Situation

An allocation study, performed in accordance with Sections 74.705, 74.706, and 74.707 of the FCC Rules indicates that the proposed Channel 24 operation will not cause objectionable interference to any authorized or proposed full-service, analog, or digital operation or authorized LPTV / TV translator stations. Table I provides the distances along each radial at intervals of 10 degrees in azimuth to the predicted F(50,50) 74 dBu contour, the average elevations, and the effective antenna heights. Table II lists pertinent stations considered in the study and shows the distances to pertinent interfering and coverage contours.

Transmitting Equipment

The following equipment will be used for the proposed operation.

Transmitter: Larkan, TTC Translator or equivalent

Antenna: Scala, SL-8 or equivalent¹

Transmission Line: Andrew, Type LDF4-50, 23 feet (7 meters) in length

The transmitter will be operated at a power output of 100 watts to achieve a maximum ERP of 1.34 kW. The antenna will be top-mounted and will replace the existing antenna with the same length on the existing tower at the 12.2 meter level, as shown in Exhibit E-1. The overall tower height above ground level remains unchanged at 18.9 meters and 1012.2 meters above mean sea level, therefore, no increase in overall height will result.

Unattended Operation

The applicant will comply with the requirements of Section 74.734 of the FCC Rules concerning unattended operation of the LPTV transmitter. A qualified person is designated to suspend operation of the translator station should this be deemed necessary.

Environmental Statement

The proposed UHF-TV antenna will be mounted at the 12.2 meter level of an existing communications tower. The tower is precluded from public access by a security fence and a locked gate.

The proposed Channel 24 operation of K18EF is a minor environmental action under Section 1.1305(d) of the FCC Rules. The predicted power density at 2 meters above ground level for a

¹Exhibit E-2: Antenna details and specifications.

downward radiation factor of 0.2 is $3.98 \mu\text{W}/\text{cm}^2$, based on the methods contained in the FCC OET Bulletin 65 (Edition 97-01 and is in compliance with permissible levels for both controlled and uncontrolled environments. With respect to work performed near the radiating elements, the licensee indicates it now complies and will comply with FCC guidelines by reducing power or by ceasing operation, in order that workers are not exposed to power density levels above those prescribed by the FCC. Since this does not require any new tower or building construction, there is no change in the other environmental categories.

For reasons stated above as indicated by the licensee, this proposal does not involve any action specified in Section 1.1306 (a)and(b) of the FCC Rules: therefore, under Section 1.1306, it is categorically excluded from the environmental processing.

SL-8
UHF-TV PARASLOT® ANTENNA
11.4 dBd Gain
470 to 862 MHz (Channels 14–69*)
Horizontally polarized

The Kathrein Scala Division SL-8 Paraslot UHF-TV antenna is a high performance slot array offering excellent performance in UHF-TV transmit applications requiring omnidirectional coverage. The SL-8 is available in single and multichannel models with a 1,000 watt power rating and optional null-fill.

Kathrein Scala Division's patented symmetrical parallel feed system is completely housed within the center of the antenna, and resists changes in radiation pattern caused by ice or snow buildup on the periphery of the antenna.

The standard SL-8 is a single-channel slot array with a power input rating of 1000 watts, VSWR of 1.1:1 maximum, 1.75 degrees of electrical beamtilt, and $\frac{7}{8}$ " EIA flange or 7/16 DIN female termination. Options include null-fill and additional beamtilt.

The SL-8-2 is designed for wideband performance over two alternate nonadjacent 6 MHz UHF-TV channels (e.g. Channels 60 and 62) permitting two transmitters to be diplexed into a single antenna. The SL-8-2 provides VSWR of 1.15:1 or better across the two specified channels.

The SL-8-3 Paraslot provides coverage of three 6 MHz alternate nonadjacent UHF-TV channels (e.g. Channels 60, 62, and 64). This arrangement allows three UHF-TV transmitters to be multiplexed into a single antenna. VSWR is held to 1.25:1 or better over the three specified channels.

*Available for 6, 7, or 8 MHz channels in accordance with various international channel allocation plans.

10479-D

PARASLOT is a registered trademark of Kathrein Inc., Scala Division.

MKPS-14	Mounting Kit for mounting to a flat plate
MKPP-23*	Mounting Kit for 2.375–3.5 inch (60–89 mm) OD mast.
MKPP-25*	Mounting Kit for 3.5–6.5 inch (89–165 mm) OD mast.
MKGK-3	Guy Kit
MKSK-3	Spreader Kit

4 inch (102 mm) diameter antennas (470–548 MHz)

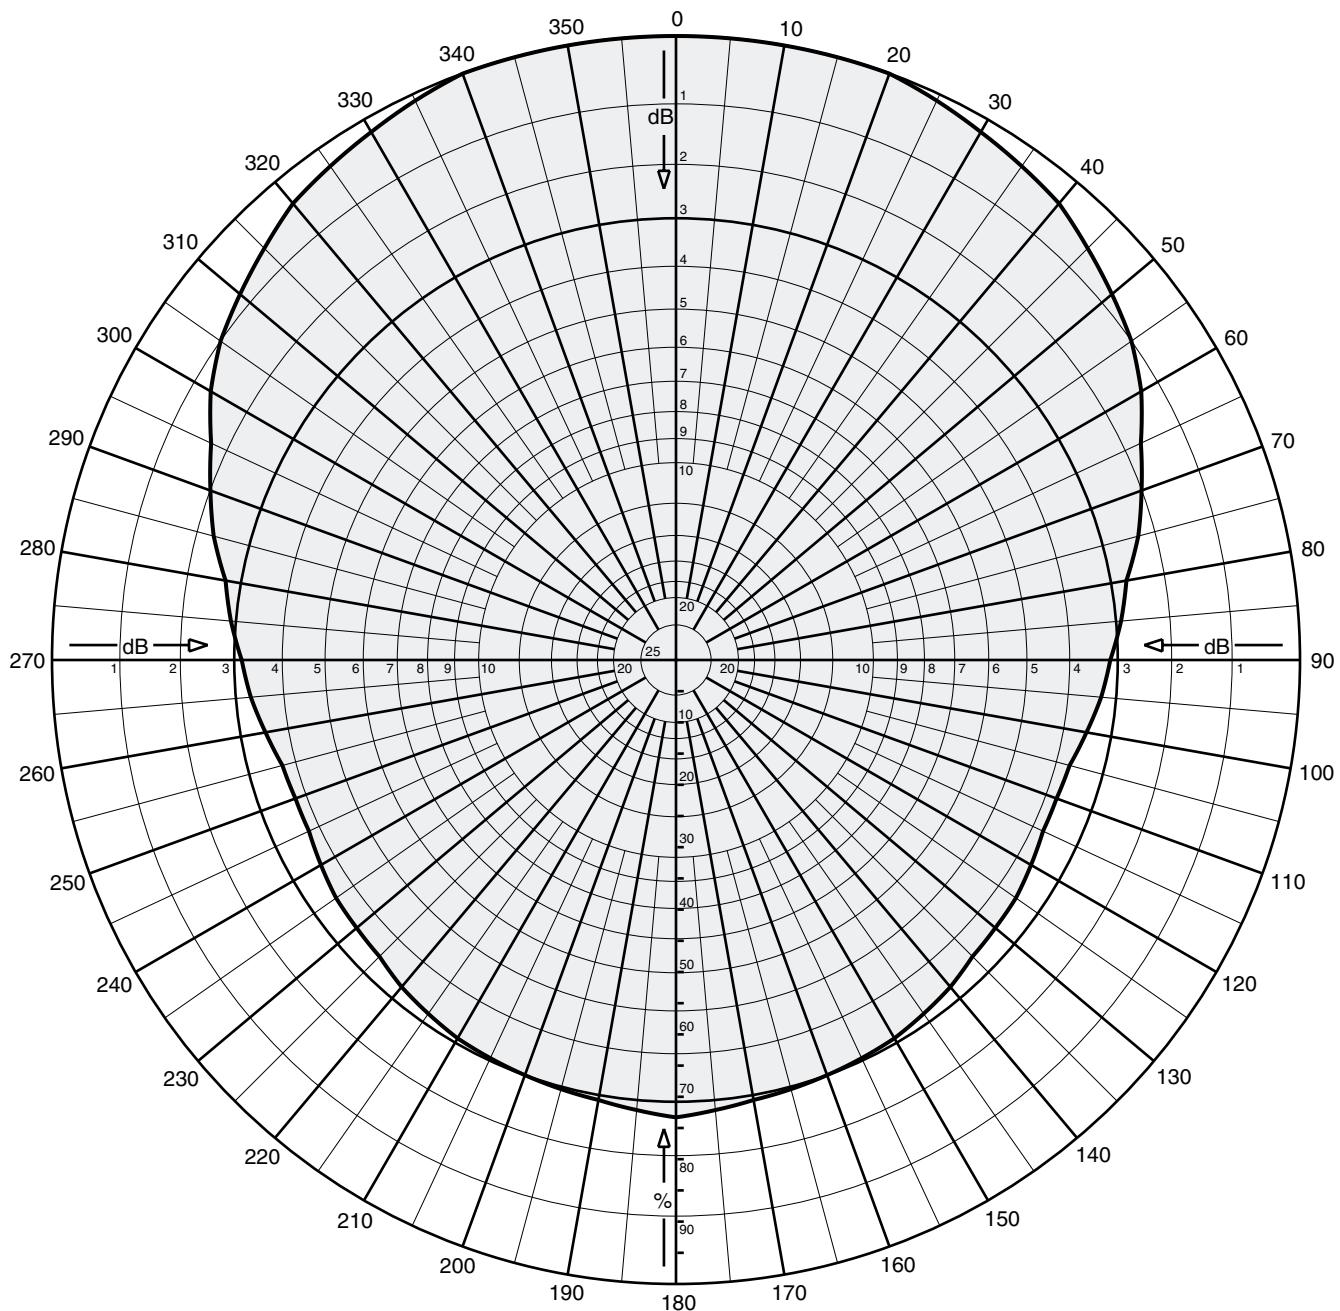

MKPS-15	Mounting Kit for mounting to a flat plate
MKPP-24*	Mounting Kit for 4–6.5 inch (102–165 mm) OD mast.
MKGK-4	Guy Kit
MKSK-4	Spreader Kit

* Pipe mounting kits for SL-8 antennas permit the installation of the antenna to a variety of pipe mast OD's. The range of OD is not intended to qualify those pipe support masts as being structurally adequate to support the antenna and in all cases, qualified structural engineering consultants should be engaged to design an adequate mount for all prevailing conditions at the installation site.

COHEN, DIPPELL AND EVERIST, P.C. Consulting Engineers Washington, D.C.

Section III - Engineering

TECHNICAL SPECIFICATIONS

Ensure that the specifications below are accurate. Contradicting data found elsewhere in this application will be disregarded. All items must be completed. The response "on file" is not acceptable.

TECH BOX

1. Channel: _____

2. Frequency Offset:

No offset Zero offset Plus offset Minus offset

3. Translator Input Channel No. _____

4. Primary station proposed to be rebroadcast:

Call Sign	City	State	Channel

5. Antenna Location Coordinates: (NAD 27)

____ ° ____ ' ____ " N S Latitude
____ ° ____ ' ____ " E W Longitude

6. Antenna Structure Registration Number: _____

Not applicable FAA Notification Filed with FAA

7. Antenna Location Site Elevation Above Mean Sea Level: _____ meters

8. Overall Tower Height Above Ground Level: _____ meters

9. Height of Radiation Center Above Ground Level: _____ meters

10. Maximum Effective Radiated Power (ERP) Towards Radio Horizon: _____ kW

11. Maximum ERP in any Horizontal and Vertical Angle: _____ kW

12. Transmitting Antenna: Nondirectional Directional "Off-the-shelf" Directional composite

Manufacturer	Model
--------------	-------

Directional Antenna Relative Field Values:

Rotation: _____ ° No rotation N/A (Nondirectional)

Degree	Value	Degree	Value	Degree	Value	Degree	Value	Degree	Value	Degree	Value
0		60		120		180		240		300	
10		70		130		190		250		310	
20		80		140		200		260		320	
30		90		150		210		270		330	
40		100		160		220		280		340	
50		110		170		230		290		350	
Additional Azimuths											

NOTE: In addition to the information called for in this section, an explanatory exhibit providing full particulars must be submitted for each question for which a "No" response is provided.

CERTIFICATION

13. **Interference.** The proposed facility complies with all of the following applicable rule Yes No sections. Check all those that apply. See Explanation in Exhibit No.

TV broadcast analog system protection.

- a. 47 C.F.R. Section 74.705.

Digital TV station protection.

- b. 47 C.F.R. Section 74.706.

Low Power TV and TV translator station protection.

- c. 47 C.F.R. Section 74.707.

14. **Environmental Protection Act.** The proposed facility is excluded from environmental processing under 47 C.F.R. Section 1.1306 (*i.e.*, the facility will not have a significant environmental impact and complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments). Unless the applicant can determine RF compliance. An **Exhibit is required.** Yes No See Explanation in Exhibit No.

Exhibit No.

By checking "Yes" above, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.

PREPARER'S CERTIFICATION ON PAGE 6 MUST BE COMPLETED AND SIGNED.

SECTION III PREPARER'S CERTIFICATION

I certify that I have prepared Section III (Engineering Data) on behalf of the applicant, and that after such preparation, I have examined and found it to be accurate and true to the best of my knowledge and belief.

Name	Relationship to Applicant (e.g., Consulting Engineer)	
Signature	Date	
Mailing Address		
City	State or Country (if foreign address)	ZIP Code
Telephone Number (include area code)	E-Mail Address (if available)	

WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001),
AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. CODE, TITLE 47, SECTION 312(a)(1)),
AND/OR FORFEITURE (U.S. CODE, TITLE 47, SECTION 503).
