RE: Antenna Orientation - WMKY, Morehead State University, Morehead, KY

Dear Mr. Ladner,

As requested, our firm determined on August 11, 2003 by field survey that the orientation of the WMKY FM antenna is at the azimuth of  $326^{\circ}50'43''$ . The azimuth was determined using the ephemeris method and is based on true north. I estimate the accuracy of the determination to be  $\pm 30'$ .

Sincerely,

Timothy E. Kelly, Licensed Professional Land Surveyor
