**UNION PARK, FLORIDA**  
**June 2015**

**EXHIBIT 9**

**SPECIAL OPERATING CONDITIONS - TECHNICAL STATEMENT**

This Technical Statement was prepared by Central Florida Educational Foundation, Inc. (“CFEF”), licensee of radio station WPOZ, Channel 202, Union Park, Florida. CFEF has a construction permit, BXPED-20140624ACC, to construct a new Class A auxiliary facility at the top of the WPOZ Studio Tower<sup>1</sup> in Altamonte Springs, FL, and herein submits a license application to cover the outstanding permit.

A calculation of the transmitter power output of the WPOZ transmitter and operating specifics are attached as **Exhibit 7**.

There are two (2) operating conditions/restrictions on the WPOZ auxiliary permit.

The first condition states: *Permittee has specified use of the antenna listed below to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. If any other type or size of antenna is to be used with the facilities authorized herein, THE AUTOMATIC PROGRAM TEST PROVISIONS OF 47 C.F.R. SECTION 73.1620 WILL NOT APPLY. In this case, a FORMAL REQUEST FOR PROGRAM TEST AUTHORITY must be filed in conjunction with FCC Form 302-FM, application for license,*

---

<sup>1</sup> FAA Glideslope checked June 2014 – No ASRN is required.

*BEFORE program tests will be authorized. The request must include a revised RF field showing to demonstrate continued compliance with the FCC guidelines.*

*Shively Model 6513/6510 Vertical Dipole, one section*

WPOZ has installed a Shively Model 6510 Vertical Dipole, one section, as authorized in the condition. Therefore, the antenna installation is in compliance with the FCC radiofrequency electromagnetic field exposure guidelines as presented in the application for the construction permit and may begin automatic program tests as authorized in 47 C.F.R. § 73.1620.

The second condition states: *The permittee/licensee must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.*

CFEF will comply with this condition. CFEF will reduce the power of WPOZ studio auxiliary, or cease operation, to protect the persons having access to the site from radio frequency electromagnetic fields in excess of FCC guidelines.

\* \* \* \* \*

Based on the foregoing, it is believed that WPOZ Studio Tower Auxiliary is constructed in compliance with the Commission's rules and that all conditions of the outstanding construction permit have been met.
