Transmitter output power: As required to achieve authorized ERP.

Maximum effective radiated power (Average): 455 kW

26.6 DBK

Height of radiation center above ground: 296 Meters

Height of radiation center above mean sea level: 585.6 Meters

Height of radiation center above average terrain: 276 Meters

Antenna structure registration number: 1059111

Overall height of antenna structure above ground (including obstruction lighting if any) see the registration for this antenna structure.

Special operating conditions or restrictions:

The grant of this construction permit is subject to the condition that, with ample time before commencing operation, you make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within your service area potentially affected by your DTV operations. Contact with state and/or local hospital associations and local governmental health care licensing authorities may prove helpful in this process. During this pre-broadcast period, you must provide all notified entities with relevant technical details of your operation, such as DTV channel, targeted on-air date, effective radiated power, antenna location, and antenna height. You are required to place in the station's public inspection file documentation of the notifications and contacts made and you may not commence operations until good faith efforts have been made to notify affected health care facilities. During this pre-broadcast period and for up to twenty (20) days after commencing operations, should you become aware of any instances of medical devices malfunctioning or that such devices are likely to malfunction due to your DTV operations, you must cooperate with the health care facility so that it is afforded a reasonable opportunity to resolve the interference problem. At such time as all provisions of this condition have been fulfilled, and either upon the expiration of twenty (20) days following commencement of operations or when all known interference problems have been resolved, whichever is later, this condition lapses.

Special operating conditions or restrictions:

- This is to notify you that the grant of this construction permit is subject to the condition that this facility can not commence operation prior to midnight of February 17, 2009, or by such other date as the Commission may establish in the future, without prior approval from the Commission.
- Operation with the facilities specified herein is subject to the following condition: If a television station listed below is authorized by Canada and begins operation, it must be protected. Protection must be determined to be acceptable by both the FCC and the Canadian government, and may be based on additional negotiation regarding the current facilities, an agreement to accept interference or the operation of reduced facilities. Unless it is deleted earlier, this condition expires at the end of the Canadian DTV transition, currently expected to be August, 2011.

Channel 23 London, ON
