THREE ANGELS BROADCASTING NETWORK, INC.
PO BOX 220
WEST FRANKFORT IL 62896

Hossein Hashemzadeh
Associate Chief
Video Division
Media Bureau

Facility Id: 20007

Grant Date: November 09, 1993
This permit expires 3:00 a.m.
local time, January 03, 1996.

Call Sign: K17MP-D

Permit File Number: BPTTL-19930330BF

This authorization re-issued to reflect new Permittee effective January 3, 1995. Date of required completion of construction: January 3, 1996.

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Callsign: K17MP-D

Permit No.: BPTTL-19930330BF

Name of Permittee: THREE ANGELS BROADCASTING NETWORK, INC.

Station Location: TX-MIDLAND

Frequency (MHz): 572 - 578

Offset: ZERO

Channel: 31

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 74.750 of the Commission's Rules.

Antenna type: (directional or non-directional): Directional

Description: SWR SWL

Major lobe directions 260
(degrees true):

Beam Tilt: Not Applicable

Antenna Coordinates: North Latitude: 32 deg 01 min 30 sec

West Longitude: 101 deg 58 min 05 sec

Maximum Effective Radiated Power (ERP) Towards Radio Horizon: 22.5 kW

Maximum ERP in any Horizontal and Vertical Angle: 22.5 kW

Height of radiation center above ground: 86 Meters

Height of radiation center above mean sea level: 932 Meters

Antenna structure registration number: None

Overall height of antenna structure above ground: 91 Meters

Special operating conditions or restrictions:

- 1 The authorization of a license to operate this station is conditioned upon the use of a transmitter that has been type accepted or meets Commission type acceptance requirements at a visual carrier frequency tolerance of plus/minus 1 kHz. In the event the transmitter has not been type accepted at this tolerance, the permittee shall, in the license application, provide full engineering data that demonstrates compliance with Section 74.750 (c)(3)(iii) of the Commission's Rules.

Special operating conditions or restrictions:

2 Conditions:

FAA facilities critical to aviation safety are located 6.94 nautical miles from the proposed transmitter site. The proposed transmitter may cause harmful interference to these ground receivers if their equipment meets only minimum Federal Communications Commission (FCC) standards for spurious emissions.

Before beginning transmissions for the facility, the proponent should contact the Austin Technical Support Manager, Tom Pickavance at 512-482-5885 or the Regional Spectrum Engineer, Gary Winsper at 817-740-3238 to coordinate site turn on and to verify that no interference is caused to FAA facilities.

According to the public notice issued by the FAA on April 17, 1991, licensees may need to employ extra filtering or take other measures if their transmissions disrupt other services. The FCC requires its licensees to cooperate fully with other federal agencies (in this case the FAA) to eliminate any harmful interference covered by the above requirements.

For any additional information regarding electromagnetic effect contact Gary Winsper. For all other information contact Stan Hale at 817-624-5534.

*** END OF AUTHORIZATION ***
