FEDERAL COMMUNICATIONS COMMISSION
TELEVISION BROADCAST STATION
CONSTRUCTION PERMIT

Authorizing Official:

Official Mailing Address:

HO'ONA'AUAO COMMUNITY TV, INC.
3901 HIGHWAY 121 SOUTH
BEDFORD TX 76021

Clay C. Pendarvis
Associate Chief
Video Division
Media Bureau

Facility Id: 27425
Analog TSID: 862
Digital TSID: 863
Call Sign: KWBN
Permit File Number: BPEDT-20000501AGA

Grant Date: March 08, 2004

This permit expires 3:00 a.m.
local time, 12 months after the
grant date specified above.

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Name of Permittee: HO'ONA'AUAO COMMUNITY TV, INC.

Station Location: HI-HONOLULU

Frequency (MHz): 644 - 650

Channel: 43

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Antenna type: (directional or non-directional): Non-Directional

Description: MC, 955118

Major lobe directions (degrees true): Not Applicable

Antenna Coordinates: North Latitude: 21 deg 23 min 45 sec

West Longitude: 158 deg 05 min 58 sec

Transmitter output power: As required to achieve authorized ERP.

Maximum effective radiated power (Average): 1000 kW
30 DBK

Height of radiation center above ground: 21 Meters

Height of radiation center above mean sea level: 716 Meters

Height of radiation center above average terrain: 577 Meters

Antenna structure registration number: None

Overall height of antenna structure above ground: 26 meters.

Special operating conditions or restrictions:

- 1 The grant of this construction permit is subject to the condition that, with ample time before commencing operation, you make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within your service area potentially affected by your DTV operations. Contact with state and/or local hospital associations and local governmental health care licensing authorities may prove helpful in this process. During this pre-broadcast period, you must provide all notified entities with relevant technical details of your operation, such as DTV channel, targeted on-air date, effective radiated power, antenna location, and antenna height. You are required to place in the station's public inspection file documentation of the notifications and contacts made and you may not commence operations until good faith efforts have been made to notify affected health care facilities. During this pre-broadcast period and for up to twenty (20) days after commencing operations, should you become aware of any instances of medical devices malfunctioning or that such devices are likely to malfunction due to your DTV operations, you must cooperate with the health care facility so that it is afforded a reasonable opportunity to resolve the interference problem. At such time as all provisions of this condition have been fulfilled, and either upon the expiration of twenty (20) days following commencement of operations or when all known interference problems have been resolved, whichever is later, this condition lapses.

Special operating conditions or restrictions:

- 2 The authority granted herein is subject to the condition that the field strength from the licensee's transmitter shall not exceed 150 mV/m as measured at the Federal Communications Commission's Waipahu, HI monitoring station. In the event of interference to monitoring, direction finding, or related operations at the Federal Communications Commission's Waipahu, HI monitoring station caused by either harmonic or spurious radiation, the licensee shall take such immediate corrective action as is necessary to eliminate the interference. This shall include responsibility for furnishing, installing, and adjusting transmitter filter circuits, shielding, or other corrective devices. If these measures fail to eliminate interference to FCC operations caused by the presence of the licensee's signal, or if the field strength exceeds 150 mV/m, the licensee shall immediately reduce power to the extent necessary to eliminate the interference and to comply with the 150 mV/m field strength limit. After determining this lower power level, the licensee shall immediately apply for a Special Temporary Authority (STA) and shall file an application to the Commission for the altered parameters.

*** END OF AUTHORIZATION ***
