Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas brings information about the natural world of animals to viewers in a non-didactic, entertaining way. Its approach in no way diminishes the learning that takes place when observations lead to conclusions- and young minds will draw many conclusions about the natural world shown in this series. These conclusions are consistent with nationally published curriculum goals in the natural sciences. They include concepts such as the functions of animals in an ecosystem (predator/prey relationships, etc.), the elements of animal classification, and the general emphasis on life science. The narration is well informed and unobtrusive, allowing for the inevitable learning that comes from wonder and delight. This series also presents in a non-exploitive way views of animal behavior and physiology that traditonal pedagogical programming might not include. The ability for young people to observe, wonder, and compare is one of the strengths of the series.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>Jack Hanna's Into The Wild continued the expected high quality, educational program content that has become the signature of Jungle Jack Productions. The program topic is suitable for both the secondary classroom and general audience with content addressing several academic outcomes designed by both state and national life science standards. Shot from a number of photographic perspectives, the viewer is introduced to the biodiversity of the area, how animals are adapted to the environment, and the changes human have imposed on the environment as well as the positive impact of local conservation efforts in the region. While Jack Hanna introduces the habitat and the wildlife, regional guides are given the "expert" status and the viewer becomes engaged in the natural environment with the same enthusiasm as Jack's family. The sub-note feature added educational value to the program content and enhanced the scientific foundation. It is also important to note that in addition to the educational content of the program, Jack brings the affective aspect to wildlife education, engaging the emotional appeal of the wild animals and the conservation message to encourage the audience to take an active interest in preserving wildlife. Combining data-oriented scientific information with concern for the conservation status of wildlife and the environment enforces the educational value and impact of the program.</p>
