Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The half-hour weekly series, "Ocean Mysteries", offers a fresh approach to the quest for aquatic understanding by blending stories of fascinating sea creatures, comparisons to popular land animals, and analogies to human experience. Hosted by Jeff Corwin, "Ocean Mysteries" is produced for ages 13-16 and beyond by showing how animals share the same behaviors, challenges and triumphs that humans do. From exciting rescues of abandoned animals to unexpected conflicts in the 'family dynamics' of the mingling species, viewers will get to know, and care about these heroes, and all of the fascinating life teeming in our oceans.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The half-hour weekly series, "Sea Rescue", features the rescue, rehabilitation and, in many instances, release back into the wild of ocean wildlife. Produced for ages 13-16, "Sea Rescue" offers educational and entertaining television by demonstrating the welfare and medical benefits that rescue and rehabilitation programs provide animals. Viewers will also learn that there's a reciprocal benefit: rescued animals provide valuable insight into their biology and ecology. This information adds to the pool of knowledge necessary to conserve threatened and endangered species. Each week, "Sea Rescue" will leave its audience inspired by the real-life stories of the featured animals and rescuers and with a fuller understanding of the rich array of sea life with which we share our planet.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	THIS TV, 23.3: "On The Spot" is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. These include self-esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and moving it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are given by diverse ethnicities and ages, by both genders, and not by stereotypes of 'smart people' is essential. It means that anyone can own information. The fact that young people will see
	'smart people' is essential. It means that anyone can own information. The fact that young people will see this on television in a non-academic setting is also very important. Whatever the curriculum or information, knowledge becomes the star - and is demonstrated by every type of person.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Antenna TV, 23.4: "Animal Atlas" is an entertaining and educational half-hour wildlife program shot exclusively in High Definition. The show introduces young viewers to every kind of animal imaginable, from the familiar to the astounding, including apes and giant lizards, sharks and tigers, and all other animals from the Americas, Africa, Asia, Australia, and everywhere in between. "Animal Atlas" promotes a better understanding of how various animal species live and what they need to survive. Each episode stands alone as an entertaining look into the world of animals- whether visiting a particular group of animals, such as big cats, or meeting the animals of an entire continent. Through "Animal Atlas", viewers discover the variety of places that animals live, how they find food, and how they play. The show also looks at how family units operate, from a community of thousands of prairie dogs, to a pride of lions, to a school of fish. Certain episodes also explore animal features such as diet, locomotion, adaptation, and how animals take care of their young. Along the way, "Animal Atlas" educates young viewers about endangered species and provides information on how to support wildlife conservation. For a population of young viewers attuned to the importance of going "green," "Animal Atlas" is not only entertaining, it is culturally relevant and important. "Animal Atlas" offers an incredible and wildly entertaining adventure through the animal world. Learning about animals has never been more fun! Just spin the globe. Anywhere, everywhere animals live, you'll find "Animal Atlas".

	Syndicated
Days/Times Program Regularly Scheduled	Sundays 12 & 12:30PM (DATM, 23.3)
Total times aired at regularly scheduled time	26
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	THIS TV, 23.3: "On The Spot" is a series tapping knowledge across a series of subject areas: geograph art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognit factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. These include self-esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and mot it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are given by diverse ethnicities and ages, by both genders, and not by stereotypes of
	'smart people' is essential. It means that anyone can own information. The fact that young people will see this on television in a non-academic setting is also very important. Whatever the curriculum or information knowledge becomes the star - and is demonstrated by every type of person.
