Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Come spend a 'day in the life' with the monsters at Wimzie's house and you'll never want to go home. It's the magical kind of daycare that leads to delightful adventures for the pre-school child. All of the characters are wild and wooly on the outside - but definitely human on the inside.After spending a half hour in this very special home away from home, no one will leave the world of Wimzie unchanged. It is the world where the real and the imaginary come together, where self esteem is the order of the day, where the emotions and the relationships of today's preschoolers, who are growing up to be ten in the year 2000, are on the top of the list of story material. Five year old Wimzie and her mother Graziella, an airline pilot, live in Yaya's house as does Rousso, Yaya's best friend - even if Yaya is at least one hundred years and fifty years old (and counting) and Russo is much more than a hundred years her younger. Graziella is more than ecstatic to have found a warm and comfortable home as well as a loving environment for her daughter, Wimzie, while she is off on her somewhat unorthodox work schedule flying around the world. It is within this setting that we meet Jonas, Archibald, Loulou, Horace, and Azuline as they work out the relationships that grow out of being together every day, of growing up just a little bit every day. They learn not only about themselves but also about the world outside the door: music, nature, art and fun are woven with a touch of humour throughout a storyline solidly crafted on socio-affective objectives. Music, songs, the art of discovery. Rhymes, magic, the sharing of secrets with friends. Storytime, word games, the acceptance of "your" way. This is what Wimzie brings into the viewers' home. A daycare full of little monsters - what could be more real? Conflict, difficulty, resolution, triumph. Laughter, tears, anger and joy. Wimzie is a world of enchantment.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. These include self esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and moving it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are giving by diverse ethnicities and ages, by both genders, and not by stereotypes of smart people is essential. It means that anyone can own information. The fact that young people will see this on television in a nonacademic setting is also very important. Whatever the curriculum or information, knowledge becomes the star and is demonstrated by every type of person

Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. These include self esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and moving it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are giving by diverse ethnicities and ages, by both genders, and not by stereotypes of smart people is essential. It means that anyone can own information. The fact that young people will see this on television in a nonacademic setting is also very important. Whatever the curriculum or information, knowledge becomes the star and is demonstrated by every type of person
