The show's target audience is between 13 and 16 years of age, the time period when children are making the transition to becoming adults. Both theory and research demonstrate that this is the stage of life where children begin to experiment with who they are who they want to be. It's a time which is typified by feeling invincible. This sense of invulnerability is commonly coupled with withdraw from parents and authority figures which leaves teenagers susceptible to poor decision making. Therefore, this time where insight and judgment are developing, but adult influence is limited, educational programming can make an immense impact on a childs decisions.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>On The Spot is a series that draws engaging content from the broadly define subject areas of science, history, art, technology, geography, math, history, language, music, and sports. Culture, both American and global, is also tapped for rich visual content. The pace is fast, the content interesting and unusual, and the visuals are what expects from television: animations, HD photography, and a mix of world-sized and microscopic points of view. Very important for entertainment and information, and often overlooked, is the practice in On The Spot of citing sources for information. This not only gives the 21st century viewer a handle to check facts on a phone, it also makes the statement that citing sources is important. Because the series pulls in startling and odd facts and information, this is crucial. The episodes grab the viewer with challenges both informal and formal (timed challenges). Writer Peter McDonnell pulls from an astonishingly wide of content and consumes a huge number of informative bites in each episode. The warmly ironic narration of Pete Sepenuk, credited for voice over, is a perfect foil for the fast moving visuals. Together, it all creates a program that satisfyingly informs and entertains the viewer.</p>

The diminutive Floogals are no taller than a large safety pin and their visual perspective is literally the point of view of the show. With the multiple challenges of their size and ignorance of all things Hooman [that's Floogal-speak for human], the Floogals have a lot of work on their hands. They are engaged in the dual processes of discovery and problem solving as nothing on earth is familiar to them. Much like young children, they begin by encountering something new and then go through a comedic multi-step process of watching, listening, touching, and note-taking until they've figured out what and how their new discovery fits into the Hooman universe.

While these predicaments take place on a space station populated by animal characters and aliens from different galaxies, the issues and resolutions resonate for a preschool audience. Through comedy and zippy action, our target audience sees how the characters learn lessons for practical living such as how to: keep track of things that belong to you, practice good habits, clean up a space when you've made a mess, rebound from a failure or embarrassing incident, or resist the urge to blame others for your mistakes.

This sense of invulnerability is commonly coupled with withdraw from parents and authority figures which leaves teenagers susceptible to poor decision making.
