In each episode Luna and her brother develop questions about whatever they find curious, e.g. what goes on inside the snails' shell?" or "Why does a firefly blink?" in pursuit of answers, Luna, Jupiter, and Clive go off on an imaginary adventure to do their research. They transform into the object or creature they are studying so they can personally experience the answers to their questions. When the threesome is finished with the "field trip" Luna summarizes everything they have learned with a show and a song.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	A beloved British series originally launched in 1969 by its writer, narrator and animator, Oliver Postgate, returns to broadcast television under the stewardship of Postgate's son, Daniel. All of the features of the original series have been retained but updated to 21st century colors and materials. The main characters are the Clanger family, a group of pink knitted mouse like creatures who walk upright-Mother, Major (who is father), Small and Tiny (the children) and Granny. Clanger Planet is small enough to walk its circumference and is also riddled with caves and tunnels that house the family and their friends-the Soup Dragon and her baby, the three Froglets, and a group of singing flowers. Contextual features and characters include a sideways lake, singing trees, a cloud that has emotions, flying "cows" and the Iron Chicken who lives in a nest of harvested metal parts from the detritus of outer space. The tone is existential-each day presents its own story-which is usually happily resolved by one of the children or another family member. The series is fittingly narrated by William Shatner (Captain Kirk from the Star Trek television series).

Doki offers fun characters each with their own strengths and weaknesses (therefore offering a broad representation of possible at-home-viewers). The team is supportive of one another and the "world" of Doki and its characters reflects the media landscape of today's child. Although the most supportive programming involves the audience through presentation of material in a way that demands intellectual interaction on the part of the viewer (ie encouraging the viewer to assist on-screen characters to solve problems), and this series might benefit from this type of "interaction," Doki does offer enthusiastic characters, real questions, and an "arguably" realist presentation of discovery. Combined, these elements will keep children engaged and support their learning.

The team is supportive of one another and the "world" of Doki and its characters reflects the media landscape of today's child. Although the most supportive programming involves the audience through presentation of material in a way that demands intellectual interaction on the part of the viewer (ie encouraging the viewer to assist on-screen characters to solve problems), and this series might benefit from this type of "interaction," Doki does offer enthusiastic characters, real questions, and an "arguably" realist presentation of discovery. Combined, these elements will keep children engaged and support their learning.
