ASTROBLAST, based on the book series by author and illustrator Bob Kolar, is set on a space station in an unknown solar system. Five animal characters and one three-eyed octopus of unknown derivation populate the station. Each episode begins with an everyday conversation or incident that grows into a predicament needing a solution. While these predicaments take place in a fantasy environment, the issues and resolutions resonate for a preschool audience. Through comedy and zippy action, our target audience sees how the characters learn lessons for practical living such as how to keep track of things that belong to you, practice good habits, clean up when you have made a mess, rebound from a failure or an embarrassing incident, or resist the urge to blame others for your mistakes.

The shops one employee, Kelly, doubles as Chicas nanny and the ensemble is rounded out with Bunji, a large floppy-eared rabbit, and Stitches, a straw mannequin that sits in the window. Chicas parents were formerly entertainers in the vaudeville tradition and they regale the audience with stories and songs from their theatrical past. They enjoy and indulge Chica, who sometimes acts younger than her age and gets into all kinds of predicaments. Kelly uses fantasy play to transform herself, Chica, Bunji, and Stitches into animated characters in another universe, who are struggling with a problem similar to the one Chica experienced in the Coop. Without fail, they find the problem can be solved and they carry that knowledge back to the Coop to use on another day.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Americans are famously terrible about geography. The last Roper Geographic Literacy Poll (2006) showed only half of young Americans could identify New York State on a map. Less than that could find Ohio. Perhaps part of the problem was that there was no television program that entertained while educating about the nations states. There is now! STATE TO STATE from Bellum Entertainment blends maps, history and facts with eye-catching visuals and clever narratives that move quickly through some of the very interesting geography in our diverse country. Target audience for tone, program content and learning concepts is middle and high school (ages 13-16).

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Americans are famously terrible about geography. The last Roper Geographic Literacy Poll (2006) showed only half of young Americans could identify New York State on a map. Less than that could find Ohio. Perhaps part of the problem was that there was no television program that entertained while educating about the nations states. There is now! STATE TO STATE from Bellum Entertainment blends maps, history and facts with eye-catching visuals and clever narratives that move quickly through some of the very interesting geography in our diverse country. Target audience for tone, program content and learning concepts is middle and high school (ages 13-16).
