The animal kingdom has an innate richness of color, form and motion and "Animal Atlas" episodes are built from this richness. The thread that links the clips together is the connection between the differing members of the animal kingdom--including our own species. In a compelling blend, animal examples are pulled from both common experience, such as the horse and cat, and exotic animals like the clouded leopard and the red panda. As the nature of animals is explored, the content and clarity create a program of exception education value.
