Question	Response
State the average number of hours of Core Programming per week broadcast by the station on its main program stream	3.0
State the average number of hours per week of free over-the-air digital video programming broadcast by the station on other than its main program stream	336.0
State the average number of hours per week of Core Programming broadcast by the station on other than its main program stream. See 47 C.F.R. Section 73.671:	6.0
Does the Licensee provide information identifying each Core Program aired on its station, including an indication of the target child audience, to publishers of program guides as required by 47 C.F.R. Section 73.673?	Yes
Does the Licensee certify that at least 50% of the Core Programming counted toward meeting the additional programming guideline (applied to free video programming aired on other than the main Yes No program stream) did not consist of program episodes that had already aired within the previous seven days either on the station's main program stream or on another of the station's free digital program streams?	Yes

Length of Program	30 mins
Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>Animal Atlas continues its tradition as a series that blends animal images with information on a wide range of life science issues in a manner that is entertaining and clever. The episodes from this season again combine facts, comparisons, and reflections on broad concepts with an engaging narration that targets the 13-16 year-old age range in both vocabulary and interest level. The "Elephant's Recall All" episode uses animal mass as a launching point for information about prehistoric animals, oceanic mammals, nonmammalian species, and African animals. The series is rich with interesting details that support examination and curiosity. Examples include these: The whale shark, not the elephant is the biggest animal (30,000 pounds); Dolphins have moustaches (nearly invisible); Giraffe are the tallest animal (at nearly 20 feet, 3,000 pounds) while African elephants are the biggest animals on land (14,000 pounds). The narrative keeps viewers interest with non-pedantic information imaginatively chosen--such as the close relationship between bears and dogs, the note that an elephant trunk has more muscles (40,000) than the entire human body, and the differing number of toes in elephant species. The program maintains educational integrity while remaining entertaining to its target age group with such devices as intercutting facial close-ups of a gorilla and a chimp as reaction shots, a narration that often addresses animals instead of the human audience, and a wonderfully whimsical musical score. Visuals, not facts, lead the content. The use of clear and colorful graphics is excellent as support for concept clarity. Size comparisons are done in silhouette, typical in state-adopted textbooks and the global map with highlighted ranges elephant species is necessary for geographic context at the 13-16 year-old age range. Additionally, there is a wide range of visuals that support viewer interest from underwater photography to close-ups of animal morphology and an editing style that includes fast cuts and split screens to better make comparative points.</p>

Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	What does it mean to "go green" as a teen? More and more young people want to know the answer to that question. Now there's Eco Company, a national TV show on a quest to find answers. Eco Company is hosted by a dynamic group of teens who combine their natural curiosity with their enthusiasm to preserve the planet they will inherit. Every week, Eco Company explores all aspects of being green and understanding how we impact our world. From reporting on the latest technologies in energy, recycling, conservation and organics to sharing the stories of young people making a positive impact on the environment. In addition, every week Eco Company provides a practical tip that teens and people of all ages can use in their daily lives. Eco Company is designed to be an interactive program, from finding out what's on the mind of all teens by talking to them wherever we find them, to providing a forum on this website for teens to share their own videos about going green.
