The show's target audience is between 13 and 16 years of age, the time period when children are making the transition to becoming adults. Both theory and research demonstrate that this is the stage of life where children begin to experiment with who they are who they want to be. It's a time which is typified by feeling invincible. This sense of invulnerability is commonly coupled with withdraw from parents and authority figures which leaves teenagers susceptible to poor decision making. Therefore, this time where insight and judgment are developing, but adult influence is limited, educational programming can make an immense impact on a childs decisions.

Include any other comments or information you want the Commission to consider in evaluating your compliance with the Children's Television Act (or use this space for supplemental explanations). This may include information on any other noncore educational and informational programming that you aired this quarter or plan to air during the next quarter, or any existing or proposed non-broadcast efforts that will enhance the educational and informational value of such programming to children. See 47 C.F.R. Section 73.671, NOTES 2 and 3.	<p>This amended filing represents a revised submission that updates the station's response to the program guides certification following the discovery of a long-standing oversight in which the station prepared but did not properly send the requisite e/I Programming Information (i.e., e/I designation and age ranges) to the program listings services. This oversight was the result of an error in the exportation of the station's program schedules, which gave the appearance that the requisite information had been sent when, in fact, it had not. Since the discovery of this export error, the station has instituted the necessary corrections, including the use of updated processes, staff training, and the implementation of system of checks and balances to ensure a similar error does not go undetected again. NBC Network Programming is adjusting E/I Program "Floogals" "Nina's World" "Ruff Ruff Tweet &amp; Dave" "Astroblast" to "Terrific Trucks" Floogal's "Nina's World" "Ruff Ruff Tweet &amp; Dave" during the 3rd quarter. Therefore, you see that we have indicated 1 run of "Floogals" "Nina's World" "Ruff Ruff Tweet &amp; Dave" "Astroblast" and 12 runs of "Terrific Trucks" Floogal's "Nina's World" "Ruff Ruff Tweet &amp; Dave" for 3rd Quarter. KCBD launched a new multi-cast channel GRIT on 10/10/14; with children's programming commencing on 10/11/14. The station offered 3 hours of Core E/I children's programming on each Saturday from 9a-12p CT through the quarter. All 6 shows are targeted for 13-16 years of age. The More You Know Webside "The More you Know's" comprehensive website (NBC.com/tmyk) compliments the on-air public service announcements, while providing in-depth referral information for viewers. Content includes: video of all current public service announcements, a general campaign overview, press releases, and referral information by topic to partnering agencies referenced in the PSAs. The diminutive Floogals are no taller than a large safety pin and their visual perspective is literally the point of view of the show. With the multiple challenges of their size and ignorance of all things Hooman [that's Floogal-speak for human], the Floogals have a lot of work on their hands. They are engaged in the dual processes of discovery and problem solving as nothing on earth is familiar to them. Much like young children, they begin by encountering something new and then go through a comedic multi-step process of watching, listening, touching, and note-taking until they've figured out what and how their new discovery fits into the Hooman universe.

Both theory and research demonstrate that this is the stage of life where children begin to experiment with who they are who they want to be. It's a time which is typified by feeling invincible. This sense of invulnerability is commonly coupled with withdraw from parents and authority figures which leaves teenagers susceptible to poor decision making. Therefore, this time where insight and judgment are developing, but adult influence is limited, educational programming can make an immense impact on a childs decisions.
