Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	This new half-hour weekly series produced for the 13-16 target audience will certainly attract viewers of all ages. Each week our host Emily Calandrelli will take viewers on incredible journeys through space that will both entertain and educate. Ever wonder what it would be like to live in space or on a different planet? Watch our host try to perform every day responsibilities while floating in zero gravity. Explore the challenges that come along with living on a different planet as our host lives like an astronaut in a Mars like habitat. We will have episodes on space robotics, commercial space tourism, asteroids, and our search for life, among many others. When appropriate, the host will highlight NASA related programs and internships for young students that are relevant to the content we have shown. Xploration Outer Space is a half hour weekly E/I series produced with the intention of increasing and expanding our target audience' interest in the field of STEM education.

Number of Preemptions Rescheduled	0
Length of Program	30 mins

Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. These include self-esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and moving it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are giving by diverse ethnicities and ages, by both genders, and not by stereotypes of smart people is essential. It means that anyone can own information. The fact that young people will see this on television in a nonacademic setting is also very important. Whatever the curriculum or information, knowledge becomes the star-and is demonstrated by every type of person.

Days/Times Program Regularly Scheduled	SATURDAYS (10/28 & 12/2 -12/30) 12 NOON aired 1 time each
Total times aired at regularly scheduled time	6
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Sports Stars of Tomorrow is a program that influences young athletes to realize their full potential both in the classroom and on the playing field. The program recognizes athletes for classroom achievements as well as their human interest contribution to help students understand the importance of dedication, discipline, commitment to academics and community involvement. The program further illustrates the importance of extracurricular activities students participate in, showing how each is a vital element to the entire student body. The band, cheerleaders, drill team, as well as both girls and boys athletic programs, are highlighted each week. Program shows a balanced picture of the extracurricular activities available for the high-school student. The episodic content will certainly further the educational,information needs of children 13-16.
