Digital Core  
Programming

| Question  | Response |
|---|----------|
| State the average number of hours of Core Programming per week broadcast by the station on its main program stream  | 3.0      |
| State the average number of hours per week of free over-the-air digital video programming broadcast by the station on other than its main program stream  | 336.0    |
| State the average number of hours per week of Core Programming broadcast by the station on other than its main program stream. See 47 C.F.R. Section 73.671:  | 7.0      |
| Does the Licensee provide information identifying each Core Program aired on its station, including an indication of the target child audience, to publishers of program guides as required by 47 C.F.R. Section 73.673?  | Yes      |
| Does the Licensee certify that at least 50% of the Core Programming counted toward meeting the additional programming guideline (applied to free video programming aired on other than the main Yes No program stream) did not consist of program episodes that had already aired within the previous seven days either on the station's main program stream or on another of the station's free digital program streams? | Yes      |

| Describe the<br>educational and<br>informational<br>objective of the<br>program and how<br>it meets the<br>definition of Core<br>Programming. | Xploration Awesome Planet will inspire and educate anyone interested in earth sciences. The host, Philippe Cousteau, the grandson of the legendary Jacques Cousteau, brings boundless energy to every location visited. From magnificent mountains to violent volcanoes, this program takes an in-depth look at the unique and distinct features on planet Earth. Viewers visit gigantic glaciers and see their beauty. They also discover why they formed and how they shaped our landscape. Geological experts share their wisdom with Philippe, as viewers strive to understand places on the earth, inside the earth, and above the earth. |

| Age of Target Child Audience   | 13 years to 16 years  |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Each week our host Emily Calandrelli will take viewers on incredible journeys through space that will both entertain and educate. Ever wonder what it would be like to live in space or on a different planet? Watch our host try to perform every day responsibilities while floating in zero gravity. Explore the challenges that come along with living on a different planet as our host lives like an astronaut in a Mars-like habitat. This new half-hour weekly series produced for the 13 - 16 target audience will certainly attract viewers of all ages. We will have episodes on space robotics, commercial space tourism, asteroids, and our search for life, among many others. When appropriate, the host will highlight NASA related programs and internships for young students that are relevant to the content we have shown. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | What will the world look like in 2050? Where will advancements in science, technology, engineering, and mathematics lead us? Xploration Earth 2050 strives to answer these questions and more with scientists, inventors, doctors, science fiction writers, and creative thinkers. This half hour weekly series, produced primarily for the 13-16 year old target audience will appeal to the whole family. Viewers will be taken on an educational adventure as the show tackles future challenges in everything from transportation to health care to the environment. |

| Length of Program  | 30 mins  |        |
| Age of Target Child Audience   | 13 years to 16 years   |        |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | <p>Xploration Weird But True will inspire and educate audiences of all ages. This series, produced in partnership with National Geographic Kids, is hosted by the brother sister team of Charlie and Kirby Engleman. Charlie is an Ecologist and Kirby is an Artist, and they are both National Geographic Junior Explorers. Together, they share a common curiosity to explore and understand the science behind the world and its wildlife. In this series, Charlie and Kirby explore a new topic each week to uncover the Weird But True science at play all around us. With a mix of graphics and handmade art, this E/I series is fun, playful and educational. For instance, in the first episode, our hosts are curious to learn about asteroids and so they set off to explore the biggest meteor crater in the US and meet a real-life meteorite hunter. They also try their hand at tracking down space rocks. Along the way, they discover that meteor crash sites can turn into quicksand. Charlie and Kirby inspire teens to question the HOW and WHY behind the way our world works, and encourage them to discover answers to their most curious questions.</p> |        |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration Nature Knows Best will inspire and educate audiences of all ages. Host and marine biologist, Danni Washington, exuded energy as she relates how technology all around us was inspired by nature and how modern innovators are continuing with this practice. We will whirl around in airplanes inspired by birds, and in helicopters influenced by the dragonfly and even jump from a few such vehicles to illustrate how wingsuits were invented based on the flying squirrel. But engineers aren't the only scientists looking toward nature. We will also meet the biologists studying the behavior patterns of ants, architects who design living buildings and roboticists who are making their designs bigger, stronger and faster based on animals. This series will help kids to understand how getting outside and taking a look around can help them make the next great discovery. Xploration Nature Knows Best airs on the primary digital stream, 27-1. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration DIY Sci will inspire and educate audiences of all ages. Host, science educator, and leader in the field of professional educational training, Steve Spangler encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step by step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. For instance, Steve Spangler became nationally known with a video of him dropping the candy Mentos into a bottle of diet soda. It erupts in a geyser of soda. On Xploration DIY Sci, Spangler demonstrates the experiment and also explains the science of why, on a molecular level, the soda reacts that way to the candy. Xploration DIY Sci airs on the primary stream, 27-1. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | This live action series based on the comic strip You Can with Beakman by Jok Church Proves that learning about science and nature can be fun and fascinating. Performance artist Paul Zaloom stars as the slightly nutty but never boring scientist whose answers to kids' questions reveal the relationship between principles of science and nature and how they impact our daily environment. Topics are addressed with cutting edge humor and state of the art visuals designed to make learning fun. Joining Beakman in his quests of onward for science are Josie, his bright young apprentice, and an oversize, sarcastic rat named Lester. Watching the show on their South Pole TV set are the penguins Herb and Don, a cynical duo who provide comments and quips as Beakman struts his scientific stuff. Beakman's World aired on the secondary digital stream, 27.2 |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | With 28 Emmy's and a slew of other prestigious awards, Disney's resident way-cool scientist knows how to get kids fired up about science. From Earth science to complex discussions on genetics, Bill Nye's enthusiasm for all things science is contagious. Bill Nye and his unique brand of Way Cool Science make complex science principles accessible for all learners. He combines the serious science of everyday things with fast-paced action and humor. There are several individual segments that are featured in each episode, such as "Way Cool Scientist", which features an expert on the episode's topic, "Consider the Following", where Nye discusses a certain aspect of the episode's topic, "Nifty Home Experiment", where the audience is shown how to do a simple home experiment relating to the episode's topic, "Try This", where the audience is shown how to try a simple demonstration relating to the episode's topic, "Hey! Look at This", where the expert shows us how to give us a closer look by relating to the episode's topic, "Check it Out", where the audience is shown how to affect their environmental issues by relating to the episode's topic, "Clever Science Trick", where the audience is shown how to do a simple science trick relating to the episode's topic, and "Did you know that...", where an interesting factoid related to the episode's topic was presented. "Luna Van Dyke, Private Detective" was one of the recurring segments on the show. The segments feature private detective Luna Van Dyke focusing on the story that is related to the episode's topic. Bill Nye, The Science Guy aired on the secondary digital stream, 27.2 |

| Program Title  | Xploration Awesome Planet  |
| Origination  | Syndicated   |
| Days/Times Program Regularly Scheduled   | Saturdays at 7:00am  |
| Total times aired at regularly scheduled time  | 13   |
| Length of Program  | 30 mins  |
| Age of Target Child Audience from  | 13 years to 16 years   |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration Awesome Planet will inspire and educate anyone interested in earth sciences. The host, Philippe Cousteau, the grandson of legendary Jacques Cousteau, brings boundless energy to every location visited. From magnificent mountains to violent volcanoes, this program takes an in-depth look at the unique and distinct features on planet Earth. Viewers visit gigantic glaciers and see their beauty. They also discover why they formed and how they shaped our landscape. Geological experts share their wisdom with Philippe, as viewers strive to understand places on the earth, inside the earth, and above the earth. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Each week our host Emily Calandrelli will take viewers on incredible journeys through space that will both entertain and educate. Ever wonder what it would be like to live in space or on a different planet? Watch our host try to perform every day responsibilities while floating in zero gravity. Explore the challenges that come along with living on a different planet as our host lives like an astronaut in a Mars like habitat. This new half-hour weekly series produced for the 13-16 target audience will certainly attract viewers of all ages. We will have episodes on space robotics, commercial space tourism, asteroids, and our search for life, among many others. When appropriate, the host will highlight NASA related programs and internships for young students that are relevant to the content we have shown. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration Weird But True will inspire and educate audiences of all ages. This series, produced in partnership with National Geographic Kids, is hosted by the brother sister team of Charlie and Kirby Engleman. Charlie is an Ecologist and Kirby is an Artist, and they are both National Geographic Junior Explorers. Together, they share a common curiosity to explore and understand the science behind the world and its wildlife. In this series, Charlie and Kirby explore a new topic each week to uncover the Weird But True science at play all around us. With a mix of graphics and handmade art, this E/I series is fun, playful and educational. For instance, in the first episode, our hosts are curious to learn about asteroids and so they set off to explore the biggest meteor crater in the US and meet a real-life meteorite hunter. They also try their hand at tracking down space rocks. Along the way, they discover that meteor crash sites can turn into quicksand. Charlie and Kirby inspire teens to question the HOW and WHY behind the way our world works, and encourage them to discover answers to their most curious questions. |

| Origination  | Syndicated   |
| Days/Times Program Regularly Scheduled   | Saturdays at 9:30am  |
| Total times aired at regularly scheduled time  | 13   |
| Length of Program  | 30 mins  |
| Age of Target Child Audience from  | 13 years to 16 years   |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration Nature Knows Best will inspire and educate audiences of all ages. Host and marine biologist, Danni Washington, exuded energy as she relates how technology all around us was inspired by nature and how modern innovators are continuing with this practice. We will whirl around in airplanes inspired by birds, and in helicopters influenced by the dragonfly and even jump from a few such vehicles to illustrate how wingsuits were invented based on the flying squirrel. But engineers aren't the only scientists looking toward nature. We will also meet the biologists studying the behavior patterns of ants, architects who design living buildings and roboticists who are making their designs bigger, stronger and faster based on animals. This series will help kids to understand how getting outside and taking a look around can help them make the next great discovery. |

| Age of Target Child Audience from  | 13 years to 16 years  |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration DIY Sci will inspire and educate audiences of all ages. Host, science educator, and leader in the field of professional educational training, Steve Spangler encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step by step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. For instance, Steve Spangler became nationally known with a video of him dropping the candy Mentos into a bottle of diet soda. It erupts in a geyser of soda. On Xploration DIY Sci, Spangler demonstrates the experiment and also explains the science of why, on a molecular level, the soda reacts that way to the candy. Xploration DIY Sci airs on the primary stream, 27-1. |
