|---|---|
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | This program centers around Beakman, who takes viewers on exciting journeys of discovery while performing experiments that demonstrate how nature, science and the world works. Some of these experiments include learning why the sky is blue or how cat's purr. Beakman is joined in his electric laboratory by a handful of denizens who help with, and sometimes hinder, his eye popping experiments. The principles taught in the show are connected to daily life in meaningful and revealing ways. This program airs on the station's digital channel 9.3. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Much of the food Americans eat is produced by farmers and ranchers in the country's heartland, but many children don't know how it's produced. "America's Heartland" provides information about the people and processes responsible for the availability of food and fuel across the country and around the world. The show's reporters and producers tell stories in topics that include farm families, consumer issues, animal welfare and crop sustainability. Children will learn about the production of the food and fuel they consume. Some episodes also take the show abroad to countries such as Egypt and Taiwan, to show the impact American agriculture has on the global economy. This program airs on the station's main program stream. |
