Digital Core
Programming

| Question | Response |
|---|----------|
| State the average number of hours of Core Programming per week broadcast by the station on its main program stream | 3.5 |
| State the average number of hours per week of free over-the-air digital video programming broadcast by the station on other than its main program stream | 336.0 |
| State the average number of hours per week of Core Programming broadcast by the station on other than its main program stream. See 47 C.F.R. Section 73.671: | 6.0 |
| Does the Licensee provide information identifying each Core Program aired on its station, including an indication of the target child audience, to publishers of program guides as required by 47 C.F.R. Section 73.673? | Yes |
| Does the Licensee certify that at least 50% of the Core Programming counted toward meeting the additional programming guideline (applied to free video programming aired on other than the main Yes No program stream) did not consist of program episodes that had already aired within the previous seven days either on the station's main program stream or on another of the station's free digital program streams? | Yes |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Much of the food Americans eat is produced by farmers and ranchers in the country's heartland, but many children don't know how it's produced. "America's Heartland" provides information about the people and processes responsible for the availability of food and fuel across the country and around the world. The show's reporters and producers tell stories in topics that include farm families, consumer issues, animal welfare and crop sustainability. Children will learn about the production of the food and fuel they consume. Some episodes also take the show abroad to countries such as Egypt and Taiwan, to show the impact American agriculture has on the global economy.This program airs on the station's secondary digital channel 2. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Think Big is a kid-hosted entertaining series for young people that follows the worlds most innovative kids as they create and invent new toys, games, learning tools, websites, and modes of transportation. The program features top kid inventors who face off against one another in an Invent-Off to see who can come up with the most innovative and creative invention. In each episode, two teams brainstorm, choose materials, and sketch and design their idea. Once completed, the inventions are then judged. This program allows kids to showcase their skills in creativity, science, innovation, marketing and teamwork. This program airs on the station's secondary channel 2. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Since the first patent was issued over 500 years ago, inventors from around the world have been trying to build "the next big thing" and become rich in the process. But for every brilliant creation, there are thousands that never get off the drawing board. However, not all failed inventions are indeed failures. The Re-Inventors follows Matt Hunter and Jeremy MacPherson as they dig up original patent designs from history's lost inventions and, for the first known time build them, test them, and try to make them work. Some designs will crash and burn, but a few others might actually prove brilliant when given a chance. Armed with blow torches and history books, they take us through the strange and entertaining world of invention, proving human beings will try to build just about anything. This program airs on the station's tertiary digital channel 3. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Much of the food Americans eat is produced by farmers and ranchers in the country's heartland, but many children don't know how it's produced. America's Heartland provides information about the people and processes responsible for the availability of food and fuel across the country and around the world. The show's reporters and producers tell stories in topics that include farm families, consumer issues, animal welfare and crop sustainability. Children will learn about the production of the food and fuel they consume. Some episodes also take the show abroad to countries such as Egypt and Taiwan, to show the impact American agriculture has on the global economy. This program will air on the station's secondary digital channel 2. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Since the first patent was issued over 500 years ago, inventors from around the world have been trying to build "the next big thing" and become rich in the process. But for every brilliant creation, there are thousands that never get off the drawing board. However, not all failed inventions are indeed failures. The Re-Inventors follows Matt Hunter and Jeremy MacPherson as they dig up original patent designs from historys lost inventions and, for the first known time build them, test them, and try to make them work. Some designs will crash and burn, but a few others might actually prove brilliant when given a chance. Armed with blow torches and history books, they take us through the strange and entertaining world of invention, proving human beings will try to build just about anything. This program will air on the station's tertiary digital channel 3. |
