Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	In accordance with the 1990 Children's Television Act which intends to increase education and informative television programming for children, Safari achieves the goals of providing children 13 to 16 years of age with a television show that meets the core programming required as determined by the FCC. Safari provides core programming in the areas of global ecology, wildlife biology and species conservation and preservation. Emmy award-winning host and wildlife expert John Ross travels to the farthest reaches of the world to bring the viewers face to face with some of the planet's most interesting animals. Safari offers a dynamic television experience for teens - with the exciting experience of exploring the fascinating world of wildlife and at the same time discovering what needs to be done to protect the animals and their habitat so that they can live on in the wild. Various age appropriate global wildlife and ecology issues are introduced to the viewing audience with in-depth and thoughtful explanations.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is an educational and informative half hour, EI program that takes viewers on a lightening fast game of entertaining trivia. Each episode delivers endless amounts of meaningful information as the show tackles some of the most mind blowing questions. Can a cow have an accent? Who got the world's longest standing ovation? As a kid, did Napoleon hate France? Questions are linked with eye catching visuals, giving viewers a chance to guess the right answers. The goal of the series is to provide young viewers with an information based program that broadens their knowledge of a wide range of educational topics.

Age of Target Child Audience	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas continues its long series life by using technology to consistently improve the essential visual component of the episodes. The high definition video of the arresting animals and animal elements is well used to engage viewers and lead them through a sequence of valued and meaningful insights. One of the series strengths continues to be that it does not just present a list of animal facts but links a wide variety of information into sequences that make knowledge of the animal kingdom both simpler and easier to remember. The interstitial quizzes have become not just summaries of previous information but a lead-in to the next organized sequence of information. The tone of credited narrator Eric Schwartz is perfect for the target group of 13-16 year old. It is non professorial and faux flip again, ideal for the target mindset of self confident adolescence. Yet the vocabulary is rich. It presumes the understanding of the words like behemoth and adaptation, but gives enough context to add that word to young viewers vocabulary without getting pedantic. Great information in a rich visual context.

Age of Target Child Audience	13 years to 16 years

Describe the What an absolutely gorgeous program. If the visual is the most efficient medium for learning and it is then educational this series sends valuable education and information on a ride straight through the optic nerve to the brain . From famous cliffs in emerald Ireland to the Blue Grotto in Capri, we are taken on a tour in high definition of a planets worth of striking natural wonders, some famous and some rarely seen. Skaftafel Iceland Victoria informational Falls the Bay of Fundy the Wave in Arizona Machu Picchu Waitom , New Zealand, Mt. Bromo in Java and objective of more are unveiled in a fast paced arresting half hour of programming. Moreover The Coolest Places on the program Earth is not content with merely showing these places. It explains how they came to be, when to see them and how it meets the best, and, thankfully, the natural laws behind their unique existence. The optics of Italys Blue Grotto are definition of explained as is the origin of the Ngorongo Crater, and the Mayan mysteries of Machu Picchu. But although a great amount of information is passed along, it is never pedantic. The information shared, important to the Programming. development of the 13-16 year old target group, comes in a light narrative the conversation tone of an awed friend. We learn why the ice caves in Skaftafel are blue, not transparent, and how the Waitomo caves in New Zealand got their name. The information is important. Without it, the visual poems of rainbows over Grand Canyon, smoking volcanic calderas, glowing worms, and time lapsed cloud shadows would boggle the mind. The coolest places are sorted out by the unique facts of their being the speed of the tides in the Bay of Fundy, the endangered cave bats in Kentucky, the Maori word origins of the Waitomo. The information, like the images, comes fast with impact, and is gone. It forces the viewer to pay attention and there are gems if they do. For example, the narrative does not dwell on the information it shares that bats are the second largest order of mammals in the world. For many in the target audience and beyond just the fact that bats are mammals would be enough. The note that some bats are endangered enough to reroute cave visitors is a revelation to anyone who thinks of bats as the eternal vampires of the animal kingdom. There is some scary stuff to mix with the beauty the tourist on his stomach peering over the edge of Victoria Falls the long bungee jumps from the African bridge the terror of being in the ice caves as they melt. For the 13 to 16 year old, a little fright makes for a satisfying episode. For adults, it means a reach for the remote to DVR the images. They are worth a freeze frame. Vac Doog the

Describe the educational and informational objective of the program and how it meets the definition of Core Programming. In accordance with the 1990 Children's Television Act which intends to increase education and informative television programming for children, Safari achieves the goals of providing children 13 to 16 years of age with a television show that meets the core programming required as determined by the FCC. Safari provides core programming in the areas of global ecology, wildlife biology and species conservation and preservation. Emmy award-winning host and wildlife expert John Ross travels to the farthest reaches of the world to bring the viewers face to face with some of the planet's most interesting animals. Safari offers a dynamic television experience for teens - with the exciting experience of exploring the fascinating world of wildlife and at the same time discovering what needs to be done to protect the animals and their habitat so that they can live on in the wild. Various age appropriate global wildlife and ecology issues are introduced to the viewing audience with in-depth and thoughtful explanations.

Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Pursuant to the Childrens Television Act of 1990, SKOOLED will satisfy the FCC Children's programming requirement and can be classified as either core or non-core programming. SKOOLED serves the educational and informational needs of children 13 to 16 years of age with its program content, including the importance of learning about the experience of being a school teacher. Teenage students and classroom teachers switch roles giving each other an up-close look at these swapped positions. SKOOLED as delivered is formatted to allow for no more than 14 minutes of total commercial time per broadcast hour (7 minutes per half-hour). SKOOLED does not display any Internet web site address or host selling during or adjacent to the program, and is otherwise in compliance with Sections 73.670(a) through (d) of the Commissions Rules. To facilitate your FCC filings, episode synopses are available on line at our website, www.telcoproductions.com. Also available on-line are testimonials from our educational advisory review board, consisting of educators and other professionals who have reviewed the series.

Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Pursuant to the Childrens Television Act of 1990, WONDERFUL WORLD will satisfy the FCC Children's programming requirement and can be classified as either core or noncore programming. WONDERFUL WORLD serves the educational and informational needs of children 13 to 16 years of age with its program content, including exploring the world of various wild animals and the importance of understanding these wild critters in the animal kingdom. The series travels around the world to learn about different species and their habitats. WONDERFUL WORLD as delivered is formatted to allow for no more than 14 minutes of total commercial time per broadcast hour 7 minutes per half hour. WONDERFUL WORLD does not display any Internet web site address or host selling during or adjacent to the program, and is otherwise in compliance with Sections 73.670 a through d of the Commissions Rules.
