Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] Xploration Nature Knows Best is hosted by Marine Biologist, Danni Washington, who exudes energy as she relates how current technology was inspired by nature, and how modern innovators are continuing with this practice. She states, we will whirl around in airplanes inspired by birds, and in helicopters influenced by the dragonfly, and even jump from a few such vehicles to illustrate how wing suits were invented based on the flying squirrel. But engineers aren't the only scientists looking toward nature. We will also meet with biologists studying the behavior of ants - architects who design living buildings, and roboticists who are making their designs bigger, stronger, and faster based on animals. This series will show kids how understanding nature can help them make the next great discovery. After all, nature knows best.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] Host, science educator, and leader in the field of professional educational training, Steve Spangler, encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step-by-step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. For instance, Steve Spangler became nationally-known with a video of him dropping the candy Mentos into a bottle of diet soda. It erupts in a geyser of soda. Spangler demonstrates the experiment and also explains the science of why, on a molecular level, the soda reacts that way to the candy.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] "Xploration Awesome Planet" is produced to inspire and educate anyone interested in earth sciences. Host Philippe Cousteau, the grandson of legendary Jacques Cousteau, brings boundless energy to every location visited. From magnificent mountains to violent volcanoes, this program takes an in-depth look at the unique and distinct features on planet Earth. Young viewers will not only see gigantic glaciers and behold their beauty, but also discover why they formed, and how they shaped our landscape. Geological experts share their wisdom with Philippe, providing in depth understanding relating to places on the earth, inside the earth, and above the earth. This is a program produced with the intention of increasing/expanding young viewers' interest in the field of STEM education (Science, Technology, Engineering, and Mathematics Education Coalition).

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] Each week host Emily Calandrelli takes viewers on incredible journeys through space that will both entertain and educate, in "Xploration Outer Space." Ever wonder what it would be like to live in space or on a different planet? Emily tries to perform every day responsibilities while floating in zero gravity, and explores the challenges that come along with living on a different planet, while she lives like an astronaut in a Mars-like habitat. Episodes will cover space robotics, commercial space tourism, asteroids, and our search for life. When appropriate, the host will highlight NASA related programs and internships for young students that are relevant to the content shown. This is a program produced with the intention of increasing /expanding young viewers' interest in the field of STEM education (Science, Technology, Engineering, and Mathematics Education Coalition).

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] What will the world look like in 2050? Where will advancements in science, technology, engineering, and mathematics lead us? "Xploration Earth 2050" strives to answer these questions and more with scientists, inventors, doctors, science fiction writers, and creative thinkers. This series, produced primarily for 13-16 year olds, will appeal to the whole family. Viewers will be taken on an educational adventure as the show tackles future challenges in everything from transportation to health care to the environment. This is a program produced with the intention of increasing/expanding young viewers' interest in the field of STEM education (Science, Technology, Engineering, and Mathematics Education Coalition).

Length of Program	30 mins
Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] This series, produced in partnership with National Geographic Kids, is hosted by the brother-sister team of Charlie and Kirby Engleman. Charlie is an Ecologist and Kirby is an Artist, and they are both National Geographic Junior Explorers. Charlie and Kirby explore a new topic each week to uncover the Weird But True science at play all around us. With a mix of graphics and handmade art, this series is fun, playful and educational. For instance, in the first episode, our hosts are curious to learn about asteroids - and so they set off to explore the biggest meteor crater in the US and meet a real life meteorite hunter. They also try their hand at tracking down space rocks. Along the way, they discover that meteor crash sites can turn into quicksand. Teens learn to question the HOW and WHY behind the way our world works, and are encouraged to discover answers to their most curious questions.

Liaison Contact

Question	Response
Does the Licensee publicize the existence and location of the station's Children's Television Programming Reports (FCC 398) as required by 47 C.F.R. Section 73.3526(e)(11)(iii)?	Yes
Name of children's programming liaison	Sheri Liguori
Address	1813 Westlake Ave N
City	Seattle
State	WA
Zip	98109
Telephone Number	(206) 674-1403
Email Address	sliguori@kcpq.com
Include any other comments or information you want the Commission to consider in evaluating your compliance with the Children's Television Act (or use this space for supplemental explanations). This may include information on any other noncore educational and informational programming that you aired this quarter or plan to air during the next quarter, or any existing or proposed non-broadcast efforts that will enhance the educational and informational value of such programming to children. See 47 C.F.R. Section 73.671, NOTES 2 and 3.	On 11/2/15, KCPQ began broadcasting This TV on 13.2. Effective 1/29/16, KCPQ began broadcasting Escape TV on 13.3, and, on 5/9/18, KCPQ began broadcasting Stadium TV on 13.4. All preemptions on 13.1 were for Fox Network sports. A few E/I shows ran in their entirety, but a few minutes off the clock, due to sports overruns. Once again, a "form software issue" persists: I entered "13" on Total times aired at regularly scheduled time for Core Program 6 (Xploration Weird But True), and Zero (0) for Number of Preemptions. However, when the report is converted to a Draft pdf Copy, it shows 13 Total times aired at regularly scheduled time, and 14 Total times aired, even though Zero (0) is still shown for Number of Preemptions, and nothing for Number of Preemptions Rescheduled. Also, for many of the core programs, even though 13 is entered as Total times aired at regularly scheduled time, 0 (zero) appears in the Total times aired field.

Program Title	Xploration Nature Knows Best
Origination	Syndicated
Days/Times Program Regularly Scheduled	Saturday, 7a, 7/6-9/28/19
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] "Xploration Nature Knows Best" is hosted by Marine Biologist, Danni Washington, who exudes energy as she relates how current technology was inspired by nature, and how modern innovators are continuing with this practice. She states, we will whirl around in airplanes inspired by birds, and in helicopters influenced by the dragonfly, and even jump from a few such vehicles to illustrate how wing suits were invented based on the flying squirrel. But engineers aren't the only scientists looking toward nature. We will also meet with biologists studying the behavior of ants - architects who design living buildings, and roboticists who are making their designs bigger, stronger, and faster based on animals. This series will show kids how understanding nature can help them make the next great discovery. After all, nature knows best.

Program Title	Xploration DIY Sci
Origination	Syndicated
Days/Times Program Regularly Scheduled	Saturday, 7:30a, 7/6-9/28/19
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] Host, science educator, and leader in the field of professional educational training, Steve Spangler, encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step-by-step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. For instance, Steve Spangler became nationally-known with a video of him dropping the candy Mentos into a bottle of diet soda. It erupts in a geyser of soda. Spangler demonstrates the experiment and also explains the science of why, on a molecular level, the soda reacts that way to the candy.

Program Title	Xploration Weird But True

Origination	Syndicated
Days/Times Program Regularly Scheduled	Sunday, 7:30a, 7/7-9/29/19
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	[13.1] This series, produced in partnership with National Geographic Kids, is hosted by the brother-sister team of Charlie and Kirby Engleman. Charlie is an Ecologist and Kirby is an Artist, and they are both National Geographic Junior Explorers. Charlie and Kirby explore a new topic each week to uncover the Weird But True science at play all around us. With a mix of graphics and handmade art, this series is fun, playful and educational. For instance, in the first episode, our hosts are curious to learn about asteroids - and so they set off to explore the biggest meteor crater in the US and meet a real life meteorite hunter. They also try their hand at tracking down space rocks. Along the way, they discover that meteor crash sites can turn into quicksand. Teens learn to question the HOW and WHY behind the way our world works, and are encouraged to discover answers to their most curious questions.
