#### Broadcaster Information and Transition Plan

| Question   | Response  |
|--|---|
| Will the station be sharing equipment with another broadcast television station or stations (e.g., a shared antenna, co-location on a tower, use of the same transmitter room, multiple transmitters feeding a combiner, etc.)? If yes, enter the facility ID's of the other stations and click 'prefill' to download those stations' licensing information. | No  |
| Briefly describe transition plan   | Replace main and aux transmitters. Replace old analog antenna system with new antenna system designed for assigned channel. Operate existing main through assigned phase. Replace aux antenna and line. Map and analyze tower; design and modify if needed. |

|-------------------------------|---|
| Justification for New Antenna | The existing primary antenna is a single channel slot which cannot accommodate the assigned channel. The proposed antenna is epol which is considered an upgrade with a 15% delta in costs according to manufacturer. However, the 399 is budgeted for h-pol. |
