Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	"Animal Atlas" is an entertaining and educational half-hour wildlife program shot exclusively in High Definition. The show introduces young viewers to every kind of animal imaginable, from the familiar to the astounding, including apes and giant lizards, sharks and tigers, and all other animals from the Americas, Africa, Asia, Australia, and everywhere in between. Animal Atlas promotes a better understanding of how various animal species live and what they need to survive. Each episode stands alone as an entertaining look into the world of animals whether visiting a particular group of animals, such as big cats, or meeting the animals of an entire continent. Through Animal Atlas, viewers discover the variety of places that animals live, how they find food, and how they play. The show also looks at how family units operate, from a community of thousands of prairie dogs, to a pride of lions, to a school of fish.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Wild About Animals is a reality science series that is produced for children in the 13-16 age group, and is designed to educate, inform and entertain those viewers. This program fulfills its purpose by providing a high level of educational value. The structure of each show consists of four (4) different segments/stories which make for a varied, fast paced program. Through the use of dramatic, stunning footage combined with an engaging and entertaining narrative, the show creates a general tone that is particularly effective in connecting to the target audience. The level of detail in each show is also appropriate and the segments move quickly from one topic to the next. The host, Mariette Hartley who is an animal rights activist and Emmy award winning actress, creates a bond with the viewer through her pleasing delivery. Coupled with a very conversational style is the MTV shooting style. The program open is visually engaging, featuring scenes of animals in their habitats in the form of a teaser for the audience.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	WHADDYADO, a half-hour weekly series designed to education, inform, inspire and entertain, does an exceptional job educating teenagers. The show's target audience is between 13 and 16 years of age, the time period when children are making the transition to becoming adults. Both theory and research demonstrate that this is the stage of life where children begin to experiment with who they are and who they want to be. It is a time which is typified by feeling invincible. This sense of invulnerability is commonly coupled with withdrawal from parents and authority fugues which leaves teenagers susceptible to poor decision making. Therefore, this time where insight and judgment are developing, but adult influence is limited, educational programming can make an immense impact on a child's decisions. WHADDYADO provides an excellent opportunity for teenagers to learn life lessons they are likely otherwise not open to receiving.

Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	"Saved By The Bell" is a weekly television series targeted to teens 13-16 years of age, which explores social themes and coping strategies through the daily school life of six teen-aged friends at Bayside High who help each other make the most of growing up in a complicated world. The multi-ethnic cast members serve as role models for young teen viewers as they deal with such issues as dealing with the death of a loved one, the right to say "no," the meaning of heroism, teenage alcohol use and other issues of particular concern to young teens. The Children's Television Act of 1990 ("CTA") imposed a requirement on the FCC to consider in its review of television station renewals the extent to which the licensee had served the educational and informational needs of children through its overall programming, including programming specifically designed to serve such needs. In adopting the CTA, Congress recognized a number of existing programs that already served such needs and in that context specifically mentioned "Saved By The Bell" in the Senate Report that accompanied the CTA, describing the program as "valuable" and "aimed at high school students and addressing typical problems and conflicts faced by teens." In adopting the regulations that implemented the CTA in 1991, the FCC also noted that Congress had singled out "Saved By The Bell" for mention: "The legislative history provides a wealth of examples of children's programming that is educational and informational. These include . . . "Saved By The Bell" (topical problems and conflicts faced by teens) . . . . Where determinations of whether a program qualifies as 'educational and informational' are in doubt, we will expect licensees to substantiate their determinations. We will rely on the guidance given in the legislative history, including the specific examples cited above, in ruling on the sufficiency of such demonstrations." Consistent with these findings, the FCC has granted the renewal applications of television stations that have relied on "Saved By The Bell" to satisfy their obligation to air programming specifically designed to serve the educational and informational needs of children aged 16 years and under.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student success.
