| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Animal Atlas continues its long series life by using technology to consistently improve the essential visual component of the episodes. The high definition video of the arresting animals and animal elements is well used to engage viewers and lead them through a sequence of valued and meaningful insights. One of the series strengths continues to be that it does not just present a list of animal facts but links a wide variety of information into sequences that make knowledge of the animal kingdom both simpler and easier to remember. The interstitial quizzes have become not just summaries of previous information but a lead-in to the next organized sequence of information. The tone of credited narrator Eric Schwartz is perfect for the target group of 13-16 year-olds. It is non-professorial and faux flip-again, ideal for the target mindset of selfconfident adolescence. Yet the vocabulary is rich. It presumes the understanding of the words like "behemoth" and "adaptation" but gives enough context to add that word to young viewers' vocabulary without getting pedantic. Great information in a rich visual context. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Teen Kids News is a national 1/2 hour weekly program that is informative, educational and entertaining! The show has been on the air since 2003, and given how many people watch it and love it, the show will be on forever! Teen Kids News (TKN) highlights positive stories about kids doing amazing things and helping to make the world a better place. In addition, the TKN reporters on the show (who are, of course, all kids!) report on everything that is fun or interesting or important about our world. These stories range from kids who fly planes to how to deal with bullying to the best way to throw a baseball for power, to tips on getting into college to making friends to behind the scenes with entertainers. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Animal Exploration with Jarod Miller brings viewers up close and personal with the most fascinating members of the animal kingdom. Animal Exploration entertains, informs, and inspires viewers as Jarod interacts with creatures in unexpected ways. Jarod's unique perspective on creatures large and small is seen in episodes such as "Need for Speed," in which viewers learn about the fast-paced lives of the animals one might expect, like cheetahs, but also about the world's fastest butterfly, the fastest striking snake, and a bird that bears a striking and deadly resemblance to the velociraptor. Each week's show features a "Did You Know?" segment, enabling viewers to take away something from the show that they can use in their own backyards. Come along with Jarod to the nearest and farthest corners of the globe as well as to your local zoo, as he explores the human/animal interaction in the face of an ever-changing world. |
