| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | This program centers around Beakman a slightly nutty scientist who takes viewers on exciting journeys of discovery while performing experiments that demonstrate how nature science and the world works. Some of these experiments include learning why the sky is blue, how a cat produces a purr and why some of the endearing bodily functions happen. He is joined in his electric laboratory by a handful of denizens who help with and sometimes hinder, his eyepopping experiments. The principles taught in the show are connected to daily life in meaningful and revealing ways. Ben Franklin hires an American teenaged boy a young English lady and a French orphaned boy as reporters during the Revolution for his newspaper the Pennsylvania Gazette. Through these reporters and their travels to ordinary homes, battlefields from Virginia to Massachusetts and the royal courts of France and England the viewer is exposed to the issues which prompted the colonies to seek freedom. Through the explanation of these issues by such historical figures as Jefferson and Paine the viewer also learns the impact theses issues have on the lives of ordinary citizens. |
