Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Doki offers fun characters each with their own strengths and weaknesses (therefore offering a broad representation of possible at-home-viewers). The team is supportive of one another and the "world" of Doki and its characters reflects the media landscape of today's child. Although the most supportive programming involves the audience through presentation of material in a way that demands intellectual interaction on the part of the viewer (i.e., encouraging the viewer to assist on screen characters to solve problems), and this series might benefit from this type of "interaction," Doki does offer enthusiastic characters, real questions, and an "arguably" realist presentation of discovery. Combined, these elements will keep children engaged and support their learning.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Mickey, a curious and adventurous Shetland Sheepdog, is a city dog who has just moved to a farm with his best friend, 14 year old Megan. Each episode follows Mickey as he experiences new things on the farm. Often Mickey gets confused or into a bind, but with the help of Megan, his friends Guy, a wise goat, and Fiona, an energetic ferret, and their Magic Book, a solution is always found and Mickey learns something new. The show is narrated by Sunny, the sun, who is always watching over the activities on the farm. Episodes end with an original song, which reiterates new things learned. The show is intended to motivate children to explore new things, ask questions, problem solve and make new friends.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas provides visual information from original and detailed footage of animals. The fast moving clips of a variety of species allows viewers to compare and contrast differing physiologies and habitats. The animal subjects are presented as they move informally and comfortably through their living activities, and the narration is well informed and unobtrusive. The program uses an interactive segment with multiple choice questions about the animals covered. The questions have just the right level of engagement and are a worthwhile component of the program. The program's constant reinforcement of species differentiation will facilitate learning for young people between the ages of 13 to 16.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Look Kool is a 30 minute program designed for children 6 to 9. On every episode, the male host, Hamza, interacts with an animated robot cat, a historical guest (played by Hamza in costume), children, and other animated creatures. The basic premise of the show is the idea that math is everywhere and each episode includes real children who help Hamza solve mathematical or scientific curiosities. Look Kool works hard to highlight for learners the link between the lesson and real life in order to activate and keep the children's interest. Live action children in real world settings put the lesson of the episode into action by seeking its value within everyday life. Look Kool is a highly educational program and speaks to the curious minds and active imaginations of elementary age kids and encourages the transfer of knowledge out into one's everyday life.

Dive Olly Dive offers a collection of boy and girl characters each with their own unique characteristics and strengths. Skid, although something of a bully, comes around in each episode and is never cruel. The team is supportive of one another and lessons of predicting, considering and discovering are cleverly interwoven into an entertaining storyline. Although the series is standard in terms of story telling, that is, it does not incorporate some of the elements that we know extend a series' power in terms of teaching, Dive Olly Dive offers relatable characters and episodes that are clearly created with the intention of supporting a child's learning. In particular this series supports a child's social development and problem solving skills.

Total times aired at regularly scheduled time	26
Length of Program	30 mins
Age of Target Child Audience from	6 years to 9 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Look Kool is a 30 minute program designed for children 6 to 9. On every episode, the male host, Hamza, interacts with an animated robot cat, a historical guest (played by Hamza in costume), children, and other animated creatures. The basic premise of the show is the idea that math is everywhere and each episode includes real children who help Hamza solve mathematical or scientific curiosities. Look Kool works hard to highlight for learners the link between the lesson and real life in order to activate and keep the children's interest. Live action children in real world settings put the lesson of the episode into action by seeking its value within everyday life. Look Kool is a highly educational program and speaks to the curious minds and active imaginations of elementary age kids and encourages the transfer of knowledge out into one's everyday life.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Doki offers fun characters each with their own strengths and weaknesses (therefore offering a broad representation of possible at-home-viewers). The team is supportive of one another and the "world" of Doki and its characters reflects the media landscape of today's child. Although the most supportive programming involves the audience through presentation of material in a way that demands intellectual interaction on the part of the viewer (i.e., encouraging the viewer to assist on screen characters to solve problems), and this series might benefit from this type of "interaction," Doki does offer enthusiastic characters, real questions, and an "arguably" realist presentation of discovery. Combined, these elements will keep children engaged and support their learning.
