Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Although change can be unsettling, most parents and educators know how readily kids embrace it. The episodes of Xploration Station Earth 2050 build on fascination children have for the power of technology, not only the seeming magic of it, but also its ability to solve pressing problems. As an early adopter and with my own long time interest in futurism, it's clear to me that students want to understand where science and technology are taking us, and the kind of world we are creating for our own children. Xploration Station Earth 2050 shows students the potential of technological trends, such as robotics, automated transport system and artificial intelligence, to change our world for the better.

Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Although change can be unsettling, most parents and educators know how readily kids embrace it. The episodes of Xploration Station Earth 2050 build on fascination children have for the power of technology, not only the seeming magic of it, but also its ability to solve pressing problems. As an early adopter and with my own long time interest in futurism, it's clear to me that students want to understand where science and technology are taking us, and the kind of world we are creating for our own children. Xploration Station Earth 2050 shows students the potential of technological trends, such as robotics, automated transport system and artificial intelligence, to change our world for the better.
