| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | This series approaches animal behavior from a uniquely scientific perspective. While most animal shows look only at the outward behaviors of animals, XPLOATION ANIMAL SCIENCE goes one step further, exploring why animals are able to excel in their environments and how they have adapted for optimal survival. Building on viewers natural curiosity about the world around them, the series examines compelling questions, such as how animals use their unique characteristics to escape danger and how they manage to secure the food necessary for survival. As the series goes on location, viewers are exposed to regions all over the world, each with their own remarkable wildlife populations. Animation, graphics and scientific analysis provide viewers with a deeper understanding of a variety of amazing creatures while stunning footage reinforces the learning experience. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | This series approaches animal behavior from a uniquely scientific perspective. While most animal shows look only at the outward behaviors of animals, XPLOURATION ANIMAL SCIENCE goes one step further, exploring why animals are able to excel in their environments and how they have adapted for optimal survival. Building on viewers natural curiosity about the world around them, the series examines compelling questions, such as how animals use their unique characteristics to escape danger and how they manage to secure the food necessary for survival. As the series goes on location, viewers are exposed to regions all over the world, each with their own remarkable wildlife populations. Animation, graphics and scientific analysis provide viewers with a deeper understanding of a variety of amazing creatures while stunning footage reinforces the learning experience. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 year old target audience, XPLOATION NATURE KNOWS BEST inspires and educates audiences of all ages. Host and marine biologist, Danni Washington, illustrates how technology all around us was inspired by nature and how modern innovators are continuing the practice -- from airplanes inspired by birds, to helicopters influenced by the dragonfly, to a wingsuit based on the flying squirrel! But engineers arent the only scientists looking toward nature. The program covers biologists studying the behavior patterns of ants; architects who design living buildings and roboticists who are making their designs bigger, stronger, and faster based on animals around us. This series not only encourages interest in STEM fields but will also show children how getting outside and taking a look around could help them make the next great discovery! |
