#### Broadcaster Information and Transition Plan

| Question   | Response  |
|--|---|
| Will the station be sharing equipment with another broadcast television station or stations (e.g., a shared antenna, co-location on a tower, use of the same transmitter room, multiple transmitters feeding a combiner, etc.)? If yes, enter the facility ID's of the other stations and click 'prefill' to download those stations' licensing information. | No  |
| Briefly describe transition plan   | Transition will be a flash cut from current channel to repack channel with expected offair time of up to two days. Ahead of antenna change, licensee will make all necessary transmitter and RF system changes. New transmitter & antenna required. |

| Interim Antenna      | Mobilization and installation/removal of interim antenna until primary antenna is installed.  |
| Phillystran guywires | The proximity of the guy wires to the antenna significantly disturbs the antenna pattern so Phillystran replacement of the top 70 ft of the top set of guy wires can be used to eliminate that issue. It is likely that foundation mats will be required. |
