Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Zoo Diaries is a Canadian documentary television series. The series documents the lives of animals and people at a zoo with a record of breeding endangered species. Events in the life of three or four animals are shown, cutting between stories every couple of minutes. Each story focuses on an animal in an interesting situation, and the zoo person responsible for handling the situation. Some situations are resolved over a number of episodes, for example, developing and performing an animal show designed to startle the audience. Topics vary from birth to death. Handlers discuss situations and difficulties in frank terms, and scenes are occasionally shown that might be disturbing for young children.
