Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The goal of Martha Speaks is to increase oral vocabulary, the words we use when we talk. The shows are not trying to teach kids how to read. They are designed to help kids understand what words mean when they hear them; words like retrieve, sprout, and crave. Vocabulary is one thing that predicts if children will be good readers. Once they are in school and they see these words, children will need to know what they mean. If children have heard the words before, that familiarity will help them as they learn to read. Martha Speaks is designed to teach up to 20 words in each show. And how better to get kids excited about learning and trying out new words than with a talking dog, who just can't stop talking?!

This series now takes the natural appeal of animals and harnesses it towards the goal of teaching science concepts to children ages 6-8. Educationally, Wild Kratts is timely, focusing on science just as educational indicators show an alarming trend of low performance and interest in science in today's children in international comparisons (NSF Indicators 2004). The smart, fun, confident, enthusiastic characters of Wild Kratts provide role models that are culturally diverse to ensure that a wide range of viewers can identify with, and thus learn with, the characters in the show.
