Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	In each episode, a different pair of teenagers joins up with an adult host for a trip to exotic places such as Hawaii, Iceland or a tropical rain forest in Central America. Each journey is a lesson in the beauty of nature, its creatures and the people who inhabit the land. The program is not designed to be "preachy" or overly pedantic but rather, the goal is to make the learning fun. The kids tour each area learning about its people, geography, climate and ecology and the things that make it unique. While there, they also do cool kid stuff like wind surfing, hot air ballooning, and horseback riding, and we join them as they engage in activities and recreation which are indigenous to each locale.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas is an entirely appropriate title for this engaging and informative series. Just as browsing through a good atlas makes information about terrain and natural boundaries accessible and appealing, this program brings information about the natural world of animals to viewers in a non-didactic, entertaining way. Its approach in no way diminishes the learning that takes place when observations lead to conclusions and young minds will draw many conclusions about the natural world shown in this series. These conclusions are consistent with nationally published curriculum goals in the natural sciences. They include concepts such as the functions of animals in an ecosystem(predator/prey relationships, etc.), the elements of animal classification, and the general emphasis on life science.

Program Title	Animal Atlas (6.2)
Origination	Syndicated

Days/Times Program Regularly Scheduled	Saturdays @ 9:30 AM (4/5 - 6/28)
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas is an entirely appropriate title for this engaging and informative series. Just as browsing through a good atlas makes information about terrain and natural boundaries accessible and appealing, this program brings information about the natural world of animals to viewers in a non-didactic, entertaining way. Its approach in no way diminishes the learning that takes place when observations lead to conclusions and young minds will draw many conclusions about the natural world shown in this series. These conclusions are consistent with nationally published curriculum goals in the natural sciences. They include concepts such as the functions of animals in an ecosystem(predator/prey relationships, etc.), the elements of animal classification, and the general emphasis on life science.
