Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The Chica Show features a five-year-old "baby" chick who spends her days with her parents in their costume shop, the Coop. The shop's one employee, Kelly, doubles as Chica's nanny and the ensemble is rounded out with Bunji, a large floppy eared rabbit and Stitches, a straw mannequin that sits in the window. In each episode Chica develops or encounters a problem that she cannot immediately resolve. Usually her issues involve impulse control, distractibility, judgment, and inter-personal behaviors. She and Kelly usually work on the problem through an adventure-a fantasy transformation to animation-- where Bunji and Stitches come alive and join Chica and Kelly for the problem solving process. The core educational content is primarily socio-emotional development, and Chica learns how to express herself properly, think before she acts, and interact with others effectively. She often learns that it takes hard work and practice to become proficient at different skills. Broadcast on the main program stream.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Justin Time is an animated show specifically directed to the preschool audience and always conveys an embedded lesson; it is possible to understand and manage any problem you have by thinking about it creatively. Justin is a little boy who has two imaginary playmates, Olivia (who meets him on his travels) and Squidgy the sponge (who also lives in Justin's bedroom). When Justin has a problem or doesn't want to do something his mother has suggested he daydreams his way into an adventure that takes him to places all around the world. On these adventures, he meets Olivia who guides him through an experience that demonstrates to Justin how he can solve his problem. The show provides many facts about the context the characters visit while on the adventure, but the central point is to teach a lesson about a social/emotional dilemma universally experienced by preschool children.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	An animated series, Zou, is the story of a 5 year old zebra, Bizou, who lives in an intergenerational household composed of his parents, grandparents, and great grandmother. They reside in a lovely brightly colored suburban community of vertical, bi-pedaled zebras that walk, talk, dress, and interact like humans. Bizou's best friend, Elzee, lives next door and his other good friend, Zac, is often found in his father's store. Bizou also has a less rewarding relationship with his snooty, spoiled cousin Zinnia, a budding ballerina. We follow Zou through his hum-drum days, vicariously participating in his birthday, a trip to the store, taking his pet parakeet Poc, to the doctor, or helping Elzee find a lost toy. The show is very centered on family and personal relationships, and the abundant adults in the family are always around to guide but not direct Bizou through his dilemmas, projects, and predicaments.
